The Rise of Generative AI. Applications, Challenges, and Ethical Implications Fatlind Mazreku,2025-12-10 Scientific Study from the year 2025 in the subject Computer Sciences Artificial Intelligence language English abstract Generative Artificial Intelligence AI refers to algorithms and models capable of producing new content such as text images music or code that mimics or even rivals human creations Recent breakthroughs in model architectures e.g. transformers and the advent of large scale models like OpenAI's GPT 3 and DALL-E have fueled an explosive growth in generative AI's capabilities and public adoption This paper provides an overview of generative AI's rise and its transformative impact across various fields We discuss key applications of generative AI in domains ranging from art and design to software development and medicine highlighting the innovative benefits it brings such as enhanced creative productivity and new problem solving tools At the same time we examine the challenges and ethical concerns emerging from generative AI's widespread use issues of bias misinformation intellectual property and misuse that have become increasingly urgent We also analyze the current technical limitations of generative AI including accuracy interpretability and resource demands and consider future outlooks for the technology The findings underscore that while generative AI offers unprecedented opportunities and innovations careful consideration of its ethical implications and proactive governance is essential to ensure it is developed and used responsibly In conclusion generative AI stands as a powerful tool that is reshaping creativity industry and society and its continued evolution will depend on balancing its benefits with diligent management of its risks

Distributed Computing and Artificial Intelligence, Special Sessions I, 22nd International Conference Rashid Mehmood,Laura Grande,Anne-Cecile Caron,Pawel Sitek,Roussanka Loukanova,Hoon Ko,Marta Plaza,Lorenzo Scatena,Michela Ricca,2026-01-01 This book serves as a forum to present applications of innovative techniques for studying

and solving complex problems in artificial intelligence and computing. This book brings together experience current work and promising future trends related to distributed computing artificial intelligence and their applications to provide efficient solutions to real world problems. Given the conference's success this book features fifteen special sessions covering a wide range of topics related to AI and other areas of interest. The accepted papers from these sessions are presented in two volumes showcasing the diverse and innovative research being conducted in these domains. This is the first volume which includes the sessions: AIMPM Special Session on AI driven methods for Multimodal Networks and Processes Modeling; CLIRAI Special Session on Computational Linguistics Information Reasoning; and AI DHC4VS Special Session on International Conference on Digital Heritage Contents for Virtual Space; GILL Special Session on and for female technopreneurs and early career researchers in distributed computing and AI; organized by the Gendered Innovation Living Labs; INNO4CFIS Special Session on Revolutionizing Carbon Farming by Nature Based Business Models and Emerging Innovations in the field of artificial intelligence satellite and green technologies; and TECTONIC Special Session on New perspectives and solutions in Cultural Heritage. The DCAI 25 technical program has selected 82 papers in special sessions and as in previous books there are special issues in ranked journals. This symposium is organized by the SMAC Team of the CRISTAL Lab of the University of Lille. We would like to thank all the contributing authors and the members of the Program Committee for their hard and highly valuable work.

Building Creative Machines: Understanding and Mastering the Possibilities of Generative AI
Gonçalo Perdigão, Filipa Matos Baptista, João Santos Pereira, This groundbreaking work explores the dynamic intersection of artificial intelligence, creativity, and innovation, unveiling how Generative AI, whether in personal projects or large scale enterprises, can be designed to collaborate and enhance human ingenuity. Cybernetics and the Constructed Environment Zihao Zhang,2024-07-25 Grounded in contemporary landscape architecture theory and practice Cybernetics and the Constructed Environment blends examples from art design and engineering with concepts from cybernetics and posthumanism offering a transdisciplinary examination of the ramifications of cybernetics on the constructed environment Cybernetics or the study of communication and control in animals and machines has grown increasingly relevant nearly 80 years after its inception Cyber physical systems sensing networks and spatial computing algorithms and intelligent machines create endless feedback loops with human and non human actors co producing a cybernetic environment Yet when an ecosystem is meticulously managed by intelligent machines can we still call it wild nature Posthumanism ideas such as new materialism actor network theory and object oriented ontology have become increasingly popular among design disciplines including landscape architecture and may have provided transformative frameworks to understand this entangled reality However design still entails a sense of intentionality and an urge to control How do we then address the tension between the designer s intentionality and the co produced reality of more than human agents in the cybernetic environment Is posthumanism enough to develop a framework to think beyond our all too human ways of thinking For researchers scholars practitioners and students in environmental design and engineering disciplines this book maps out a paradigm of

environmentalism and ecological design rooted in non communication and uncontrollability and puts a speculative turn on cybernetics Chapters 8 and 9 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Deep Learning in Banking Cristian Bravo, Sebastian Maldonado, Maria Oskarsdottir, 2026-01-15 Unlock the potential of artificial intelligence to transform financial services for a new era Deep Learning in Banking Leveraging Artificial Intelligence for Next Generation Financial Services by Cristian Bravo, Sebastian Maldonado, and Maria Oskarsdottir is a compelling resource that highlights the critical intersection of AI and banking. It offers actionable insights and practical solutions for leveraging deep learning in lending institutions. With increasing regulatory challenges and the need for sophisticated models, this book provides essential strategies to navigate the evolving landscape of financial services. Structured for both academic and professional use, Deep Learning in Banking delivers a comprehensive examination of the methodological frameworks of AI applications in lending. You'll learn to combine images, text, time series, graphs, and structured data to develop multimodal deep learning and large scale models and how they relate to explainability and fairness with practical examples and real world case studies that ensure effective implementation. Inside the book, learn how to develop AI models within the modern regulatory environment. Explore multimodal data to develop deep learning models for financial institutions. Discover case studies highlighting the application of advanced machine learning techniques in banking. Deep Learning in Banking is written for academics, financiers, banking professionals, and data scientists eager to revolutionize their approach to financial services. The book empowers its readers with the knowledge and tools needed to harness AI's full potential, paving the way for innovative and compliant solutions in the banking industry.
