advocates for open source as a transformative force in corporate IT. It critiques proprietary restrictions and vendor lock ins, urging businesses to adopt open source solutions to achieve technological independence and strategic advantages. This book serves not merely as a theoretical exploration but as a practical guide for embracing open source technologies. The book's core message is that open source goes beyond software; it is a strategic ally that redefines corporate operations. It champions a shift from traditional rigid IT systems to agile modular architectures founded on open source tools. The transition the book argues is not just technical but a reinvention of corporate processes in the digital era. Readers are guided through building resilient cloud infrastructures, interconnected networks, and secure data systems, all powered by open source technology. Highlighting its broader applications, the book explores how tools like ERPNext enhance operational efficiency across departments, while cybersecurity solutions like Passbolt and Wazuh strengthen defenses against evolving digital threats. Beyond technical merits, the book celebrates the ethos of the open source community: collaboration, rapid development, and shared problem solving. It encourages businesses to contribute to this collective growth. As digital evolution accelerates, this manifesto positions itself as an essential resource for corporate leaders, IT experts, and innovators. It advocates moving beyond proprietary software to explore open source solutions that enhance efficiency, security, and societal progress. Ultimately, the book rallies for a future in corporate IT defined by openness, flexibility, and security, showcasing the transformative impact of open source philosophy and the pioneers driving this change.

*AI Management System Certification According to the ISO/IEC 42001 Standard* Sid Ahmed Benraouane, 2024-06-24

The book guides the reader through the auditing and compliance process of the newly released ISO Artificial Intelligence standard. It provides tools and best practices on how to put together an AI management system that is certifiable and sheds light on ethical and legal challenges business leaders struggle with to make their AI system comply with existing laws and regulations and the ethical framework of the organization. The book is unique because it provides implementation guidance on the new certification and conformity assessment process required by the new ISO Standard on Artificial Intelligence ISO 42001:2023 Artificial Intelligence Management System published by ISO in August 2023. This is the first book that addresses this issue. As a member of the US ISO team who participated in the drafting of this standard during the last 3 years, the author has direct knowledge and insights that are critical to the implementation of the standard. He explains the context of how to interpret ISO clauses, gives examples and guidelines, and provides best practices that help compliance managers and senior leadership understand how to put together the AI compliance system to certify their AI system. The reader will find in the book a complete guide to the certification process of AI systems and the conformity assessment required by the standard. It also provides guidance on how to read the new EU AI Act and some of the US legislations such as NYC Local Law 144 enacted in July 2023. This is the first book that helps the reader create an internal auditing program that enhances the company's AI compliance framework. Generative AI has taken the world by storm, and currently, there is no international standard that

provides guidance on how to put together a management system that helps business leaders address issues of AI governance AI structure AI risk AI audit and AI impact analysis ISO IEC 42001 2023 is the first international mandatory and certifiable standard that provides a comprehensive and well integrated framework for the issue of AI governance This book provides a step by step process on how to implement the standard so the AI system can pass the ISO accreditation process
