On Display John D. Boy,Justus Uitermark,2023-12-14 Two billion people around the world use Instagram but so far social scientists have done little research on the platform Despite Instagram s reputation for shallowness the ongoing self presentation it demands confronts users with profound dilemmas Who are we What do we want to show of ourselves What do we aspire to be On Display is a book about how people remake their worlds through social media John D Boy and Justus Uitermark provide an encompassing account of how a platform that is unfailingly polished and ruthlessly judgmental shapes us and our environments They examine how personalities relations social movements urban subcultures and city streets change as they are represented on Instagram Interviews and ethnographic vignettes render an intimate account of the desires and anxieties that animate the platform Just as importantly Boy and Uitermark reveal how Instagram is implicated in

social inequalities While previous accounts have argued that social media promote polarization On Display shows that this is not the case for Instagram where users belong to large and diverse networks compelling them to take many often contradictory expectations into account This means users shy away from producing statements or images that may cause offense as a way to preserve their public image and their social connections Drawing on sociological theory long term qualitative inquiry in Amsterdam and computational analyses Boy and Uitermark argue that grasping the power of Instagram and other social media platforms requires seeing them not as digital networks of communication and sharing but as a stage for the expression and affirmation of social status

public in an expected Initial Public Offering in May 2012 Why does Facebook want Instagram so badly What can businesses learn from this deal and how the heck did a tiny company without any revenue become so desirable in just 18 months While Instagram's buyout by Facebook was viewed by many as a surprise acquisition it illustrates the increasing importance of the image based social sharing platforms in today's technology business world Facebook already had a photo sharing mobile photo sharing program but it was slow to load and clumsy to use For the past several years a team had been working on developing a solution As recently as last summer rumours circulated about a Facebook iPhone photo sharing application that would make it easier for users to upload edit and share their photos With changes in team members and little to show for their work nothing more was heard of Facebook's progress until February 2012 when Business Insider magazine reported new product boss Dirk Stoop was working on a new solution to the problem Zuckerberg was reported in the New York Times piece With Instagram Deal Facebook Shows its Worth as saying We don't plan on doing many more of these if any at all but providing the best photo sharing experience is one reason why so many people love Facebook and we knew it would be worth bringing these two companies together It is safe to assume that Facebook's own product was not working out as hoped leading Zuckerberg to buy the best photo sharing experience instead of developing it In addition to examining details of the acquisition there are broader issues to address How can businesses use Instagram and Facebook to build their own brands What does this deal say about Facebook's predictions for the mobility market and photo sharing platforms While Zuckerberg's official statement is that Instagram will continue operating as a separate platform from Facebook and that people who have Instagram but aren't on Facebook can continue using their favorite app how will Instagram change now that it is owned by Facebook In this book we will address these questions and review a quick history of Instagram We'll examine the events of Easter weekend that led to the Instagram buyout and get a glimpse into the fast moving world of high tech business and multi billion dollar companies EXCERPT FROM THE BOOK Mark Zuckerberg and Facebook paid 1 billion for a business that doesn't have any revenue Why In a nutshell Facebook purchased Instagram to take custody of its users before Facebook competitors did to strengthen its position in the mobile phone market and to get rid of a potentially difficult competitor As people in the tech world often say money follows the users The recent availability of Instagram for Android users had Zuckerberg concerned especially when the Instagram user population jumped by 10 million people in 10 days buy the book to continue reading
