Digital Scholarship in the Tenure, Promotion and Review Process Deborah Lines Andersen, 2015-04-15 To receive tenure college and university professors have long been required to write scholarly monographs or articles engage in serious research and teach effectively In recent years however the emergence of digital scholarship has revolutionized and complicated the picture in unexpected ways as new electronic media have enabled academics to communicate scholarly material in innovative formats such as websites PowerPoint presentations CD ROMs and virtual reality tours Despite this growing output of sophisticated digital scholarship there has been little attempt to set standards define basic issues and concepts or integrate electronic scholarship into the tenure debate This collection of cutting edge articles marks the first effort to evaluate the place of digital scholarship in the tenure promotion and review process As a primer aimed at scholars faculty members and department chairs in the humanities social sciences and other fields as well as deans provosts and university administrators this collection examines the evolution of nontraditional scholarship analyzes the various formats and suggests guidelines for assessment on a scholarly level It also examines the impact of digital scholarship in the classroom and academy and explores new directions for the future This book will help shape policy in the murky world of tenure review and could become a central text for scholars and administrators everywhere

*Education Scholarship in Healthcare* April S. Fitzgerald, Gundula Bosch, 2023-11-28 Academic medical centers continue to require evidence of scholarly activity for their faculty to maintain their appointment and to advance in promotion rank For some training to know how to obtain evidence of scholarship was obtained through fellowship where information was passed from mentor to mentee in an apprenticeship fashion without a formalized text to follow to obtain the information In fellowship information might flow through word of mouth or articles handed down out to a mentee Others in fellowship develop skills by taking classes as part of an additional master s degree program such as a Master of Public Health For health professionals who enter an academic institution without having gone through a fellowship program they are still expected to perform scholarly activity but don t have the benefit of having done the apprenticeship to learn the skills so unless they decide to find a course obtain a master s degree or find a fellowship they have no way to gain the necessary skills and are at risk of losing their appointment and have no hope of progressing in promotion This text provides a comprehensive toolbox for the academic who needs these skills to survive It serves as a valuable resource for health professionals physicians nurses pharmacists physical therapists and allied professionals as well as scientists and students with the steps necessary to take their educational endeavors from idea to implementation through dissemination Beginning with the concept of What is Scholarship the authors walk the reader through the concepts of how to find your niche look through the literature to check for a gap design a question consider evaluation and outcomes be aware of ethical considerations plan a project look for support find mentorship prepare an abstract present a poster disseminate a project and lead a team All chapters are written by experts in the subject matter
