Canada-U.S. Tax Comparisons John B. Shoven, John Whalley, 2007-12-01 In the increasingly global economy domestic tax policies have taken on a new importance for international economics. This unique volume compares the tax reform experiences of Canada and the United States, two countries with the world's largest bilateral flow of trade and investment. With the signing of the U.S.-Canada Free Trade Agreement and the tax reforms of the 1980s, there has been some harmonization of tax systems. But geographic, cultural, and political characteristics shape distinct national social policies that may impede harmonization. As the U.S. and Canadian economies become even more integrated, differences in tax systems will have important effects in particular on the relative rates of economic growth. In this timely study, scholars from both countries show that while the United States and Canada exhibit similar corporate tax structures and income tax systems, they have very different approaches to sales tax and social security taxes. Despite these differences, the two countries generate roughly the same amounts of revenue, produce similar costs of capital, and produce comparable distributions of income.

The Oxford Handbook of State and Local Government Finance Robert D. Ebel, John E. Petersen, 2012-03-21 State and local government fiscal systems have increasingly become vulnerable to economic changes. Over the past three decades, state and local deficits during economic recession have been larger and deeper each time. The impact of the Great Recession and its aftermath of feeble growth and lingering high unemployment has been dramatic, both in scope and intensity. Before the crisis, long-term structural deficits were persistent for both individual governments and the entire sector as spending plans and patterns outpaced governments' revenue-generating capacity. The revenue systems of these governments eroded while the workloads and scope on the expenditure side of the state and local system budget continued to grow. This handbook evaluates the persistent problems in the fiscal systems of state and local governments and what can be done to solve them. It contains 35 chapters authored by 60 practitioners and academics who are renowned scholars in state and local finance. Each chapter provides a description of the discipline area, examines major developments in policy practices and research, and opines on future prospects. The chapters are divided into four sections. Section I is a systematic discussion of the institutional, economic, and political framework that provides a background for understanding the structure and financial performance of the state and local sector. The chapters in Section II provide an overview of the various components of state and local revenue systems and how they reacted to the Great Recession. They analyze the diverse forms of taxes and charges in detail, prescribe remedies and alternatives, and examine the implications for future revenue performance. Chapters in Section III turn to spending, borrowing, and financial management in the state and local sector. The focus is on the big six service delivery sectors: education, health care, human services, transportation, pensions, and housing. Section IV is a set of chapters that look ahead and speculate about how the state and local government sector's money-raising, spending, and service delivery structures will adjust to the new circumstances.

Commission on Private Philanthropy and Public Needs,1977 **Effective Federal Tax Rates Under Current Law, 2001**

To 2004 Ed Harris,2008 Examines how effective federal tax rates will change over the coming decade under current law that is if the provisions of tax laws enacted in 2001 2002 2003 phase in phase out sunset as scheduled Under current law the assumption that incomes grow at a constant rate the overall effective federal tax rate drops from 21 5% in 2001 to 19 6% in 2004 It then rises irregularly over the subsequent decade as tax provisions phase in out The increases in the effective tax rate between 2005 2010 between 2011 2014 occur primarily because rising real incomes move taxpayers into higher tax brackets the alternative minimum tax affects more taxpayers over time Charts tables

Presidential Control over Administration Patrick O'Brien,2022-04-27 The US Constitution recognizes the president as the sole legal head of the executive branch Despite this constitutional authority the president s actual control over administration varies significantly in practice from one president to the next Presidential Control over Administration provides a new approach for studying the presidency and policymaking that centers on this critical and often overlooked historical variable To explain the different configurations of presidential control over administration that recur throughout history collapse innovation stabilization and constraint O'Brien develops a new theory that incorporates historical variation in a combination of key restrictions such as time knowledge and the structure of government as well as key incentives such as providing acceptable performance and implementing preferred policies O'Brien

then tests the argument by tracing the policymaking process in the domain of public finance across nearly a century of history beginning with President Herbert Hoover during the Great Depression and ending with the first two years of the Trump presidency. Although the book focuses on historical variation in presidential control especially during the New Deal era and the Reagan era the theory and empirical analysis are highly relevant for recent incumbents. In particular O'Brien shows that during the Great Recession and beyond the initial efforts of Presidents Barack Obama and Donald Trump to change the established course during a period of unified party control of the government were largely undercut by each president's limited control over administration. Presidential Control over Administration is a groundbreaking contribution to our understanding of the presidency and policymaking.

Fiscal Reforms in Low-Income Countries Mr. Benedict J. Clements, Mr. Liam P. Ebrill, Mr. Sanjeev Gupta, Mr. Anthony J. Pellechio, Mr. Jerald Alan Schiff, Mr. George T. Abed, Mr. Ronald T. McMorran, Marijn Verhoeven, 1998-03-31 The reform of fiscal policies and institutions lies at the heart of structural adjustment in developing countries. Although the immediate aim of such reform is to reduce fiscal imbalances to achieve macroeconomic stability the long term goal is to secure more durable improvements in fiscal performance. This study reviews the fiscal reform experience of 36 low income developing countries that undertook macroeconomic and structural adjustment in the context of the IMF's Structural Adjustment Facility and Enhanced Structural Adjustment Facility during the period of 1985-95.
