Teaching Creatively And Teaching Creativity:

Teaching Creatively and Teaching Creativity Mary Banks Gregerson, Heather T. Snyder, James C. Kaufman, 2012-11-13 Creative teaching as well as teaching creativity are cutting edge issues in psychology today as recent academic and popular media coverage has shown. This volume expands on that interest with chapter authors drawn from interdisciplinary areas. It includes examples of creatively teaching across the education system including preschool K-12, undergraduate and graduate level education. The variety of subjects covered by the chapters include psychology, math, science, and reading. In addition to creative teaching which may lead to enhanced learning and achievement in students as well as enhanced creativity, another focus is teaching with the objective to enhance creativity.

Teaching Creatively and Teaching Creativity Springer, 2012-11-01 *Teaching Creative Behavior* Doris J. Shallcross, 1985 **The Creative Classroom**

Keith Sawyer, 2019-08-09 *The Creative Classroom* presents an original compelling vision of schools where teaching and learning are centered on creativity. Drawing on the latest research as well as his studies of jazz and improvised theater, Sawyer describes curricula and classroom practices that will help educators get started with a new style of teaching guided improvisation where students are given freedom to explore within structures provided by the teacher. Readers will learn how to improve learning outcomes in all subjects from science and math to history and language arts by helping students master content area standards at the same time as they increase their creative potential. This book shows how teachers and school leaders can work together to overcome all too common barriers to creative teaching: leadership, structure, and culture, and collaborate to transform schools into creative organizations. Book Features: Presents a research-based approach to teaching and learning for creativity; Identifies which learning outcomes support creativity and offers practical advice for how to teach for these outcomes; Shows how students learn content area knowledge while also learning to be creative with that knowledge; Describes principles and techniques that teachers can use in all subjects; Demonstrates that a combination of school structures, cultures, incentives, and leadership are needed to support creative teaching and learning.
