Teams And Technology:

Virtual Teams Jessica Lipnack, Jeffrey Stamps, 1997-04-18 Teams are the key to smart flexible and cost effective organizations for the 21st century. However, advances in communication technologies have dramatically changed the nature of teamwork. Traditional collocated teams are now giving way to distributed cross boundary virtual groups linked through relationships and technology, reaching across space, time and organizational boundaries. In their fifth book, *Virtual Teams*, Jessica Lipnack and Jeffrey Stamps, leading experts in networked organizations, take you beyond teams into the new world of work at a distance, showing you how to effectively start, implement and maintain virtual teams in your own organization. Today, virtual teams are an established feature of multisite and global companies such as Hewlett Packard, Motorola, Bank of Boston and Steelcase. Made possible by technologies like the Internet, intranets and groupware, these teams are invaluable tools for organizations that need to bring together specialized groups of people to work on projects or comprise a spread out business unit. The principles outlined in *Virtual Teams* provide an antidote to the high failure rate of teams. At the same time as the authors warn, it is harder for virtual teams to be successful than for traditional face to face teams. Misunderstandings are more likely to arise and more things are likely to go wrong. In this straightforward guide, Lipnack and Stamps provide a comprehensive framework that makes virtual teams accessible and practical. Beginning with a brief overview of exactly what virtual teams are and how they work, the authors show how they can be integrated into your business structure. Featuring insightful case studies from Eastman Chemical Company, NCR, Tetra Pak and Sun Microsystems, this stimulating and hands on reference offers essential information on the basic virtual team principles: people, purpose, links, the skills and technologies necessary for creating a successful virtual team. Supporting the dynamics of the cross boundary team and enhancing personal communications electronically, *Virtual Team Applications of the Internet*'s newest offspring, intranets. Providing an in depth look at an increasingly important teamwork tool, *Virtual Teams* gives you the materials you need to create and build a winning virtual team for your own organization. If you want to see where organizational communications are going in the future, heed what these pioneers have written today. Howard Rheingold, Author of *The Virtual Community* and Founder of Electric Mind. Lipnack and Stamps have written an important book for the 21st century corporation, Regis McKenna. The McKenna Group, author of *Relationship Marketing*. This book provides a long overdue perspective on how to apply the discipline of real teams in the fast moving, increasingly dispersed information age of the future. Jon R.
