

Technical Manual

The credit descriptions in the STARS Technical Manual include the following sections which inform data gathering and the reporting process:

- **Credit Rationale**—provides background on the importance of the credit in the context of sustainability.
- **Criteria**—describes how an institution earns points for the credit.
- **Applicability**—indicates which institutions' STARS Ratings will be affected by their responses to the credit. As previously mentioned, some credits do not apply to some types of institutions. For example, credits involving residence halls do not apply to institutions that do not have residence halls.
- **Scoring**—explains how points are allocated for the credit.
- **Reporting Fields**—lists the fields that appear within the Reporting Tool for each credit. Some fields are required while others are listed as optional if the institution wishes to provide additional information.
- **Timeframe**—describes the time period from which data should be drawn. For some credits, particularly those that are based on the presence of a policy or program, institutions should report on current practices (i.e. status at the time of reporting). Other credits, particularly those based on quantitative performance, require historical performance data, typically drawn from a one-year period.
- **Sampling and Data Standards**—provides guidelines on when institutions may use a representative sample to measure performance and when samples are prohibited.
