

WHAT IS TECHNICAL WRITING?

Introduction

Picture a typical technical manual. It's a huge, incomprehensible volume, usually used as a doorstop, and only opened when all else fails, right?

Not necessarily. Take a look at these technical manuals:

- *The Moosewood Cookbook*
- *Reader's Digest Do-it-Yourself Manual*
- *Juggling for the Complete Klutz*
- *How to Keep Your Volkswagen Alive*

What do they have in common? They're all books that:

1. Break a thing or action down into its basic elements
2. Describe the basic elements
3. Tell the reader how to use or perform them.

How Does Technical Writing Differ from Creative Writing?

Technical manuals are designed to function as tools, not as works of art. So technical writers use a different set of rules when they build a manual:

- *Usability* – how easily can the reader find information?
- *Clarity* – how easily can the reader understand the information?
- *Maintainability* – how easily can the information be updated?

In all cases, the reader's needs come first.

Analyzing the Audience

Before technical writers can decide what type of manual fits the reader's needs, they must perform an audience analysis to find out *what* the reader needs:

- *What is the reader's average educational level?*
- *Why will the reader be using this product?*
- *Why will the reader be using this manual?*
- *What is the reader's attitude toward the product and the manual?*
