The Cultures Of Alternative Mobilities:

The Cultures of Alternative Mobilities Professor Phillip Vannini, 2012-12-28 The Cultures of Alternative Mobilities presents a series of ethnographic studies focusing on the local cultures of mobilities and immobilities emphasizing the everyday sense of contingency and heterogeneity that accompanies them Compensating for the excess of theory and criticism based on the notion of hypermobilities this book sheds light on the nuanced differences and idiosyncrasies of mobility with a view to rediscovering meanings and lifestyles marked by movement and immobility Original empirical and global case studies are presented by an international team of scholars exploring the complex negotiated and contingent nature of the social worlds of movement By avoiding sweeping generalizations on the deeply connected and readily mobile nature of society as a whole this volume sheds light on the diversity of mobility modes in an accessible and interdisciplinary form that will be of key interest to sociologists geographers and scholars of human mobility communication and culture *Mobility, Space and Culture* Peter Merriman, 2012-07-26 Over the past ten to fifteen years there has emerged an increasing concern with mobility in the social sciences and humanities In *Mobility Space and Culture* Peter Merriman provides an important and timely contribution to the mobilities turn in the social sciences encouraging academics to rethink the relationship between movement embodied practices space and place The book takes an interdisciplinary approach drawing upon theoretical and empirical work from across the social sciences and humanities to provide a critical evaluation of the relationship between mobility and place site reformulating places as in process open and dynamic spatial formations Merriman draws upon post structuralist writings on space practice and society to demonstrate how movement is not simply practised or experienced in relation to space and time but gives rise to rhythms forces atmospheres affects and materialities which are often more crucial to embodied apprehensions of events than sensibilities of spatiality and temporality He draws upon detailed empirical research on experiences of and social reactions to driving in late Victorian and Edwardian Britain to trace how the motor car became associated with sensations of movement space and enmeshed with debates about embodiment health visibility gender and politics The book will be essential reading for undergraduates and postgraduates studying mobility in sociology geography cultural studies politics transport studies and history Mobilities in Remote Places Phillip Vannini, 2023-07-21 *Mobilities in Remote Places* explores the meanings challenges and opportunities of remoteness as practiced and experienced by those who live and work in some of the world's most remote communities As mobilities around the world proliferate in countless forms the meanings of remoteness undergo significant change Places once considered impossibly distant have appeared to become closer more accessible and less distinct from global centers of geopolitical power But instead of disappearing altogether configurations of remoteness evolve manifesting themselves through new possibilities new challenges and new insecurities Drawing from a variety of case studies from around the globe the contributors of the book examine remoteness as an outcome of evolving mobility constellations Rather than defining remoteness as an absolute or

objective time distance condition the book shows how remoteness is a practice experience and representation that is situated relational and emergent This collection of original and thought provoking chapters will be of interest to students and researchers in the humanities and social sciences with an interest in mobilities place and human geography Chapter 10 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Lifestyle Mobilities Dr Scott A Cohen, Dr Tara Duncan, Ms Maria Thulemark, 2014-01-28 Being mobile in today's world is influenced by many aspects including transnational ties increased ease of access to transport growing accessibility to technology knowledge and information and changing socio cultural outlooks and values These factors can all engender a re formation of our everyday life and moving as and for lifestyle has in many ways become both easier and much more complex This book highlights the crossroads between concepts of lifestyle and the growing body of work on mobilities The study of lifestyle offers a lens through which to study the kinds of moorings dwellings repetitions and routines around which mobilities become socially culturally and politically meaningful Bringing together scholars from geography sociology tourism history and beyond the authors illustrate the breadth and richness of mobilities research through the concept of lifestyle Organised into four sections the book begins by dealing with aspects of bodily performance through lifestyle mobility Section two then looks at how we can use mobile methods within social research whilst section three explores issues surrounding ideas of mobility immobility and belonging Finally section four draws together a number of chapters that focus on the complexities of identity within mobility Often drawing on ethnographic research contributors all share one common feature they are at the forefront of research into lifestyle mobilities

The Routledge Handbook of Mobilities Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10 The 21st century seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally socially and ethically As a result mobility has become a keyword of the social sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of

mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study

Community Carsharing and the Social-Ecological Mobility Transition Luca Nitschke, 2022-07-14 This book investigates how practices of community carsharing are influencing everyday mobility It argues that hegemonic practices of automobility are reconfigured through practices of community carsharing thereby challenging capitalist mobilities in the realm of everyday life Through a detailed empirical study of practices of community carsharing and its practitioners in the rural regions around Munich Germany this book reveals how the practice contributes to the emergence of alternative automobile practices meanings identities and subjectivities It also explores the embedding of automobility into its ecological context the connection of function and community in practices of community carsharing and the changing of ownership relations through a process of commoning mobility This reconfiguration of everyday practices of automobility takes place through processes of everyday resistance re embedding and commoning and ultimately results in the emergence of an alternative mobility culture thereby facilitating the dissemination of an alternative common sense of community carsharing This book on community carsharing provides a valuable insight into carsharing in rural settings and exemplifies how carsharing specifically and sharing mobilities in general can contribute to a social ecological mobility transition The work will be of particular interest to scholars and practitioners working in mobility studies and mobilities

Moving Towards Low Carbon Mobility Moshe Givoni, David Banister, 2013-01-01 For a thorough and thoughtful perspective on what it will take to de carbonize cities of the future this book is a must read Technology alone we are told will not create the post carbon city As important is coming to grips with a complex web of cultural institutional financial and social factors that powerfully shape mobility choices now and in the future A balanced holistic approach that reveals how the many elements of contemporary transport systems work together offers the best hope for achieving more sustainable less carbon intensive mobility futures Robert Cervero University of California Berkeley US This is not just another book about transport and climate change It sensibly places transport within the much broader concept of mobility and explores all aspects of travel behaviour of people and goods and the infrastructure needs to serve these leading to a balanced set of policy proposals This volume compiled by an internationally eminent team of researchers is essential reading for all those wanting a balanced and objective analysis of this critical topic Roger Vickerman University of Kent UK A unique assemblage of papers by top international experts that together cover every aspect of the transport mobility environment relationship

today's central issue for transport planners worldwide Sir Peter Hall University College London UCL UK The transport sector has been singularly unsuccessful in becoming low carbon and less resource intensive This book takes an innovative and holistic social cultural and behavioural perspective as well as covering the more conventional economic and technological dimensions to provide a more complete understanding of the mobility and transport system and its progress towards high carbon mobility The book uses this platform to explore the means to achieve low carbon mobility through outlining alternative pathways through an investigation of theories of change and through alternative visions of the low carbon transport city The book's core message is that the complexity of the mobility and transport system should not encourage inaction but strong and immediate action In addition to implementing a wide range of policy measures the book argues for a fundamental change in thinking when it comes to transport policy governance and analysis approaches before low carbon mobility becomes a reality Bringing together the latest thinking on transport mobility and the environment this book will appeal to researchers and students interested in sustainability issues and sustainable transport and transport related areas in particular including policy makers as well as a more general professional audience

Mobilities in Remote Places

Phillip Vannini, 2023-07-21 Mobilities in Remote Places explores the meanings challenges and opportunities of remoteness as practiced and experienced by those who live and work in some of the world's most remote communities As mobilities around the world proliferate in countless forms the meanings of remoteness undergo significant change Places once considered impossibly distant have appeared to become closer more accessible and less distinct from global centers of geopolitical power But instead of disappearing altogether configurations of remoteness evolve manifesting themselves through new possibilities new challenges and new insecurities Drawing from a variety of case studies from around the globe the contributors of the book examine remoteness as an outcome of evolving mobility constellations Rather than defining remoteness as an absolute or objective time distance condition the book shows how remoteness is a practice experience and representation that is situated relational and emergent This collection of original and thought provoking chapters will be of interest to students and researchers in the humanities and social sciences with an interest in mobilities place and human geography

Art and Visibility in Migratory Culture Mieke Bal, Miguel Á Hernández-Navarro, 2011 This book explores the idea that art can enact small scale resistances against the status quo in the social domain These acts which we call little resistances determine the limited yet potentially powerful political impact of art From different angles seventeen authors consider the spaces where art events occur as political spaces and explore how such spaces host events of disagreements in migratory culture The newly coined word migratory refers to the sensible traces of the movements of migration that characterize contemporary culture In other words movement is not an exceptional occurrence in an otherwise stable world but a normal generalized process in a world that cannot be grasped in terms of any given notion of stability Thus the book offers fresh reflections on art's power to move people in the double sense of that verb and shows how it helps to illuminate

migratory culture s contributions to this process **Mobile Methodologies** Benjamin Fincham,Mark McGuinness,Lesley Murray,2010-01-15 How do we research and represent mobile experiences of being in place momentarily of passing through This book explores the movement of bodies through space examining perceived limitations and considering methodological responses technologies and strategies designed to inform our understanding of people s experience of movement through space *Journal of Public Transportation* ,2011 **Journal of Bacteriology** Charles-Edward Amory Winslow,James Morgan Sherman,John Roger Porter,1928 Alternative (Im)Mobilities Maria Alice Nogueira,2022-07-27 By introducing the new concept of alternative im mobilities this collection draws attention to a different approach to mobility practices In doing so this ground breaking volume explores a range of issues related related to im mobilities and the Covid 19 pandemic transport and social practices and media and urban tourism Designed and organized in a legally or illegally way alternative im mobilities are examples of those daily practices of displacement of people objects and information which mobilize a multidisciplinary framework of urbanization shedding light on important and long standing issues of inequality and the lack of recognition of diversity in economics social and culture urban life This volume opens up a new set of research questions related to the complex ways in which informal actors cope with their everyday life experience regarding dwelling commuting working caring of vulnerable people health issues access to information among other mobility practices besides the lack of essential and infrastructural public services This volume will be of great interest to researchers and scholars in geography and the social sciences interested in mobilities transport communication tourism mobility justice and inequality public decision making and health studies **Transnational Professionals and Their Cosmopolitan Universes** Magdalena Nowicka,2006 This book focuses on the relationship between physical space and social mobility focusing on the new phenomenon of the international professional who makes the world his home Mobile people Magdalena Nowicka reveals create their own spatial and cultural universes through daily routines and practices Even the choice of a specific residence Nowicka shows has definite local and global consequences Grounded in the influential theories of Ulrich Beck as well as the latest research in the sociology of space Transnational Professionals and their Cosmopolitan Universes is an important contribution to continuing debates on globalization and sociology **One Less Car** Zachary Mooradian Furness,2010-03-12 Discusses the power of the bicycle to impact mobility technology urban space and everyday life **Environment & Planning** ,2012 *Journal of Anthropological Research* ,2021 *3rd International Symposium Communication in the Millennium, May 11-13, 2005* ,2005 Constructing Vernacular Culture in the Trans-Caribbean Holger Henke,Karl-Heinz Magister,2008 Constructing Vernacular Culture in the Trans Caribbean traces the contradictory cultural trajectories constructed and re produced in the fluid diasporic spaces we call the Trans Caribbean Particular emphasis is placed on such cultural expressions that reflect or derive from the cultural vernacular and popular culture as it exists in these spaces Its multidisciplinary approach and focus on different language areas in the Trans Caribbean are of particular interest to scholars
