Features examples of people whose lack of common sense resulted in their demise in a tribute to how the evolutionary process is improved when individuals of questionable intelligence accidentally remove themselves from the gene pool. *Education Deform* James M. Kauffman, 2002. According to James M. Kauffman too much of what is said today about educational reform is nonsense that shortchanges students, parents and taxpayers. This deforms education rather than reforming it. The primary objective of this book is to help teachers, teacher educators, policy makers and parents think more critically about current rhetoric about education. Reason and science in the enlightenment tradition are more helpful in reforming and improving education than political agendas. Reform should focus on instruction. Education must address the full range of learners from those who are mentally retarded to those who are intellectually gifted. Special education, multicultural education and standardized testing are among the controversial issues explored. Extremes of both left and right ideologies are rejected in favor of careful thinking and sound judgment. *The Darwin Awards 4* Wendy Northcutt, 2006. A new collection of tongue in cheek tributes to people whose own lack of judgment led to their demise includes a homeowner who filled his house with natural gas to kill termites, a motorcycle rider who steered with his feet and a welder who incorporated a grenade into a chain. 300,000 first printing. *The Darwin Awards II* Wendy Northcutt, 2001. Only two things are infinite: the universe and human stupidity, and I'm not sure about the universe. Albert Einstein. Scientific adviser to the Darwin Awards. One of the best known and most frequently visited web sites is the Darwin Awards web site. Practically everyone who is on the net has received a Darwin story in their e-mail at one time or another. It is one of those legendary sites which has become part of the fabric of being on line. This is the sequel to the bestselling *Darwin Awards* and elaborates on the universal themes of death and stupidity. These stories are about the people for whom warnings such as 'coffee is hot' and 'this Superman cape does not enable the wearer to fly' were made. This new book includes over 100 brand new award winners, honourable mentions, debunked urban legends, the return of some all-time favourites as well as some science and safety tips for readers on how to avoid the scythe of natural selection. This the newest collection of magnificent misadventures appeals to the market who continue to make *The Darwin Awards* a continual best-selling phenomenon. It is the must-have humour title for the next holiday season and beyond. *Encyclopedia of Evolution* Stanley A. Rice, 2009. Evolutionary science is not only one of the greatest breakthroughs of modern science but also one of the most controversial. Perhaps more than any other scientific area, evolutionary science has caused us all to question what we are, where we came from and how we relate to the rest of the universe. *Encyclopedia of Evolution* contains more than 200 entries that span modern evolutionary science and the history of its development. This comprehensive volume clarifies many

common misconceptions about evolution For example many people have grown up being told that the fossil record does not demonstrate an evolutionary pattern and that there are many missing links In fact most of these missing links have been found and their modern representatives are often still alive today The biographical entries represent evolutionary scientists within the United States who have had and continue to have a major impact on the broad outline of evolutionary science The biographies chosen reflect the viewpoints of scientists working within the United States Five essays that explore interesting questions resulting from studies in evolutionary science are included as well The appendix consists of a summary of Charles Darwin's *Origin of Species* which is widely considered to be the foundational work of evolutionary science and one of the most important books in human history The five essays include How much do genes control human behavior What are the ghosts of evolution Can an evolutionary scientist be religious Why do humans die Are humans alone in the universe
