**The Development of Mathematical Logic** P. H. Nidditch,2019-11-04 Originally published in 1962 A clear and simple account of the growth and structure of Mathematical Logic no earlier knowledge of logic being required After outlining the four lines of thought that have been its roots the logic of Aristotle the idea of all the parts of mathematics as systems to be designed on the same sort of plan as that used by Euclid

and his Elements and the discoveries in algebra and geometry in 1800 1860 the book goes on to give some of the main ideas and theories of the chief writers on Mathematical Logic De Morgan Boole Jevons Pierce Frege Peano Whitehead Russell Post Hilbert and Goebel Written to assist readers who require a general picture of current logic it will also be a guide for those who will later be going more deeply into the expert details of this field A Short History of Logic Robert Adamson, 2008-11

A SHORT HISTORY OF LOGIC by EGBERT ADAMSON Originally published in 1911 PREFACE THE article on Logic which Professor Adamson contributed to the ninth edition of the Encyclopaedia Britannica consists of a critical survey of the history of logical theory its value is well known to philosophical students and no apology is needed to justify its publication in separate form It may be mentioned however that this publication was thought to be important at the present time as the work was in danger of becoming less easily accessible owing to the issue of the eleventh edition of the Encyclopaedia in which it is not reprinted The manuscript of the article has been fortunately preserved alone among the manuscripts of the authors published writings It is much fuller than the printed article a number of passages some fifty in all having been struck out by the editor with a view to economy of space These passages affect both text and notes they vary in length from a few words to whole sections they vary also in importance but the authors own opinion was that the value of his 6 iG xSb vi PREFACE work had suffered by their omission and with this opinion I agree In the present book these passages have been restored to their place so that the article as it left the authors hands is now for the first time placed before the reader The manuscript bears no trace of the editorial blue pencil and the original proof no longer exists so that a doubt may arise as to whether any particular omission may not have been made by the author himself when he corrected the proofs But it is clear from a comparison of manuscript and print that his proof corrections were few and unimportant No real difficulty therefore has arisen in deciding upon the restorations The authors style was so concise that greater brevity could not be attained without sacrifice of the matter It should be borne in mind that the article on Logic was written and published in 1882 The supplementary articles by which it is followed in this volume are all contributions to the history of logic but the first of these that on Category also reprinted from the Encyclopaedia Britannica dates from six years earlier and only the last carries the story on towards a more recent development of logical theory Readers of the authors works do not need to be reminded that his own point of view underwent modification and that there are some things here which he might have expressed differently had he revised the work himself With the authors manuscript and printed copy before me my own work as editor has consisted chiefly in selecting the material and seeing it through the press Some omitted references have been supplied a few slips of the pen or the press formerly overlooked have been corrected unwieldy paragraphs have been broken up and the punctuation has been simplified but nothing new has been added to text or notes I am responsible for the choice of a title It remains for me to express my grateful thanks to the Syndics of the Cambridge University Press for allowing the publication of the articles on Logic and on Category in the present form For permission to reprint the critical notices from Mind with which

the volume ends I am indebted to the kindness of Professor Davidson of Aberdeen literary executor of the late Professor Bain

of the abstract Their details if you like are abstractions Walking on God s earth as a pedestrian as a farmer working his fields

details may stand in the way of conjuring the big picture It may be difficult to compare whichever field one happens to be in
