The Development Of Second Language Proficiency:

The Development of Second Language Proficiency Birgit Harley,Patrick Allen,Jim Cummins,Merrill Swain,1990

The Development of Second Language Proficiency Ontario Institute for Studies in Education,1990-03-30 This text presents the findings of a major investigation of second language proficiency in various groups of school aged learners It invites a frank appraisal of the research from an outside panel of experts The theoretical and practical implications of the study are the subject of a lively debate focused on three main research issues the nature of second language proficiency the impact of classroom treatment on second language learning and the role of social and individual factors in bilingual development This original collection of articles will be of interest to all those concerned with policy and practice in second language education

Diagnosing Foreign Language Proficiency J. Charles Alderson,2006-11-01 This book addresses the need for tests that can diagnose the strengths and weaknesses in learners developing foreign language proficiency It presents the rationale for and research surrounding the development of DIALANG a suite of internet delivered diagnostic foreign language tests funded by the European Commission The word diagnosis is common in discussions in language education and applied linguistics but very few truly diagnostic tests exist However the diagnosis of foreign language proficiency is central to helping learners make progress This volume explores the nature of diagnostic testing emphasizing the need for a better understanding of the nature of appropriate diagnosis The book starts with a debate about how diagnostic testing might most appropriately be developed Charles Alderson argues that the field has neglected to construct diagnostic tests partly because other forms of testing have dominated the field Alderson examines how proficiency has been diagnosed in the key areas of language reading listening writing grammar and vocabulary The value of self assessment is discussed and exemplified as a key component in developing learners and teachers awareness of the complexity of language learning The book ends with a consideration of and recommendations for future developments in the diagnosis of foreign language proficiency

The Role of Second Language Proficiency in the Development of Second Language Reading

Efficiency Eynat Katz,1997 This study examines the role of second language proficiency in learning to read fluently in a second language Sixty subjects were randomly sampled from a Hebrew Day School in Toronto Twenty children were in each of grades two four and six All children had English as their first language L1 and Hebrew as their second language L2 In each grade subjects were given parallel tasks in Hebrew and English reading isolated words and reading these same words in a text Accuracy and speed were measured by timing the subjects as they performed each of these tasks They were also administered parallel comprehension and oral cloze sentence tasks in each language in order to determine their level of language proficiency syntactic and semantic knowledge In general subjects in grade 2 and 4 had an advantage in their L1 on all measures The results indicated that by grade 6 however subjects no longer do significantly better in their L1 English on

the accuracy speed and proficiency measures The importance of semantic and syntactic knowledge in reading a second language and of the role of orthographic complexity are discussed **Studies in Second Language Acquisition** ,1997

The Handbook of Advanced Proficiency in Second Language Acquisition Paul A. Malovrh,Alessandro G.

Language Proficiency Ludo Verhoeven,John H. A. L. de Jong,1992-01-01 This books aims to open up new perspectives in the study of language proficiency by bringing together current research from different fields in psychology and linguistics All contributions start out from empirical studies which are then related to applications in language assessment The book also serves as a survey of recent developments in psycholinguistic research in the Netherlands The book starts out with a thorough introduction of international literature on models of language proficiency language development and its assessment Section 1 deals with first language proficiency and addresses such problems as grammar in early child language grammatical proficiency and its in variance across a range of ages reading abilities and writing skills Section 2 focuses on multilingual proficiency and deals with test bias in relation to the background of the second language learner bilingual proficiency in ethnic minority children the development of the second language learner lexicon communicative competence of school age children in the context of second language learning the assessment of foreign language attrition and the dimensionality in oral foreign language proficiency **Production-oriented and Comprehension-based Grammar Teaching in the Foreign**

Language Classroom Anna Mystkowska-Wiertelak, Mirosław Pawlak, 2012-03-02 The book addresses one of the key controversies in teaching foreign language grammar which is the utility of production oriented instruction as exemplified in the PPP sequence and comprehension based teaching as implemented in interpretation tasks and processing instruction. It provides a thorough overview of issues related to learning and teaching grammar with a particular focus on input oriented approaches and reports the findings of four studies which sought to compare their effects with instruction based on different forms of output practice. The findings serve as a basis for guidelines on how the two options can be successfully combined in the classroom

The Development of a Common Framework Scale of Language Proficiency Brian North, 2000 Scales describing language proficiency in a series of levels can provide orientation for educational programmes criteria for assessment and reporting to stakeholders. However in most cases such instruments are produced just by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the Common Reference Levels in the Common European Framework of Reference for modern languages. Short stand alone descriptors were i developed and classified ii refined and elaborated in workshops and then iii scaled by analyzing the judgments of one hundred teachers on the English language proficiency of the learners in their classes

Advanced Proficiency

and Exceptional Ability in Second Languages Kenneth Hyltenstam, 2016 While the literature on second language acquisition and use is overwhelmingly rich with respect to initial and intermediate stages of development present knowledge of levels of ultimate attainment that are equal or close to that of native speakers has so far not been presented in a coherent manner. This is what the present volume aims to achieve. In addition to chapters that summarize what is currently known about the grammatical, lexical and discourse features that continue to exhibit instability at the most advanced levels of second language development the volume presents overviews of the incipient research on two unique learner populations polyglots and employees in international call centres. Polyglots defined as language users who are proficient in six or more second languages may be considered second language learners par excellence. Call centre employees in economically less

developed parts of the world are intriguing in how they cope with the high language proficiency requirements of their job In conclusion this book is relevant for all readers both professionals and students interested in the development of second language theory For language teachers the book provides insights that are profitable in classrooms for advanced learners
