**Meditation and the Evolution of Cosmic Consciousness** Don Ayre, B.A., B.S.W., M.S.W., 2011-03-11 This book is about the little known fact that there are four different kinds of meditation Witness Meditation Transformative Meditation Discursive Meditation and Transcendental Meditation More often each kind of meditation is promoted and practiced apart from the others But combined as a process they lead to cosmic consciousness and more loving attitude toward one's self and planet Earth Instead of the violence of interpersonal competition and environmental exploitation so prevalent today the ideals of peace justice and harmony can become the new reality given a more integrated approach to life's material intellectual emotional and spiritual realms of

experience But in spite of the enormous advances in technology we are still caught up in unwinnable wars that cost lives and resources of all the participants we are still confronted by the injustices of social and economic controls that have most recently resulted in meltdowns and we are still faced with that seemingly unsolvable environmental problems that are plaguing our planet today Seemingly the leadership of our global community is failing us So it s up to us as individuals Meditation and the Evolution of Cosmic Consciousness is not a how to book however It is an attempt to identify the process in a way that can be imitated To do so Don Ayre has reviewed his private practice as a family and child therapist and the writings of a number of historical figures that he recognizes as great minds for evidences of cosmic consciousness that can be used to build a living model Ayre invites his readers to examine their uses of meditation and the writings of their favorite authors to contribute their thoughts and ideas that will assist with the evolution of cosmic consciousness **The Motherly Earth** Joseph Peruma,2002 **The Genius of Earth Day** Adam Rome,2013-04-16 The first Earth Day is the most famous little known event in modern American history Because we still pay ritual homage to the planet every April 22 everyone knows something about Earth Day Some people may also know that Earth Day 1970 made the environmental movement a major force in American political life But no one has told the whole story before The story of the first Earth Day is inspiring it had a power a freshness and a seriousness of purpose that are difficult to imagine today Earth Day 1970 created an entire green generation Thousands of Earth Day organizers and participants decided to devote their lives to the environmental cause Earth Day 1970 helped to build a lasting eco infrastructure lobbying organizations environmental beats at newspapers environmental studies programs ecology sections in bookstores community ecology centers In *The Genius of Earth Day* the prizewinning historian Adam Rome offers a compelling account of the rise of the environmental movement Drawing on his experience as a journalist as well as his expertise as a scholar he explains why the first Earth Day was so powerful bringing one of the greatest political events of the twentieth century to life *Alienation: Plight of Modern Man?* William Christian Bier,1972 His estrangement not only from the world but from himself as well has become one of the more pervasive characteristics of modern man Youth with its subculture and counterculture minorities alienated from society and from other minorities generations driven apart by conflicts in lifestyles all are manifestations of this contemporary problem Such a topic addressed by the 1971 Institute of Pastoral Psychology lends itself to and indeed requires an interdisciplinary approach As in precious Institutes and their published proceedings invaluable contributions have been made by the behavioral and social sciences theology philosophy and the law to an understanding of the problems encountered not only in pastoral work but also in the broader areas of human life and its associations The present volume views alienation as a many faceted malaise having its remote roots in philosophy and religion and more recently in the writings of political and social theorists This general historical background is followed by an exploration of contemporary influences such as war and international tension Next three focal points are given extended treatment alienation in the political and social order the alienation of youth and

religious alienation Not ignored are selected manifestations of alienation affecting the aged the poor and those set apart by their homosexuality Finally representatives from four differing disciplines suggest what might be modern man s responses to his sense of estrangement This volume Number Seven in the Pastoral Psychology Series will undoubtedly appeal to a wider readership than that which the Institute originally intended *Communications* ,1970 Thinking Ecologically Bruce Morito,2002 Arguments about the environment in the history of Western thought accompany a guide to developing an approach to environmental thought based on ecological attunement in this analysis of the fundamental concepts that ground environmental policy Sustainability sustainable development and conservation are three concepts that illustrate the relationship between humans and the environment A synthesis of Western Eastern and Aboriginal approaches to the environment offers a radically new way of thinking about how environmental ethics develop and evolve *The Church and the Ecological Crisis* Henlee H.
