## A COUNTRY WITH A LOT OF POSSIBILITIES JAVIER CLEMENTE ENGONGA AVOMO

Few countries in the world have a real chance of being free, independent and prosperous as the Republic of Equatorial Guinea But trying to reinvent the wheel so often calls into question not only the credibility but also the efficiency of trying to build castles on sand Many regions have missed the opportunity to grow because of many bad decisions behind which only corruption and ignorance prevailed To fly without learning to walk is risky enough but to build a nation without national objectives without nationalism, patriotism and brotherhood is to relive the past of subjugation to darkness It is true we are all Guineans but what some people feel for their brothers is often questioned when they oppress with all their decisions the well-being of a majority that no longer knows how to express itself that apolitical majority that only asks and demands peace well

being and prosperity because it is more than its right But to talk like this in this country is more than talking about politics it is offensive to those who tolerate neither justice nor freedom because to talk about peace is painful for those who destroy peace Javier Clemente Engonga 22 07 2021 **Intellectual Property Law and the Fourth Industrial Revolution**

Christopher Heath,Anselm Kamperman Sanders,Anke Moerland,2020-05-22 The convergence of various fields of technology is changing the fabric of society Big data and data mining Internet of Things artificial intelligence and blockchains are already affecting business models and leading to a social and economic transformations that have been dubbed by the fourth industrial revolution Focusing on the framework of intellectual property rights the contributions to this book analyse how the technical background of this massive transformation affects intellectual property law and policy and how intellectual property is likely to change in order to serve the society Well known authorities in intellectual property law offer in depth chapters on the roles in this revolution of such concepts and actualities as the following power and role of data as the raw material of the revolution artificial inventors and creators trade marks in the dimension of avatars and fictional game characters concept of inventive step change where the person skilled in the art is virtual data rights versus intellectual property rights transparency in the context of big data interrelations of data technology transfer and antitrust self executable and smart contracts redefining the balance among exclusive rights development technology transfer and contracts and proprietary information versus the public domain The chapters also provide complete analyses of how big data changes decision making processes how sustainable development requires redefinition how technology transfer is re emerging as technology diffusion and how the role of contracts and blockchain as instruments of monitoring and enforcement are being defined Offering the first in depth legal commentary and analysis of this highly topical issue the book approaches the fourth industrial revolution from the perspectives of technical background society and law Its authoritative analysis of how the data driven economy influences innovation and technology transfer is without peer It will be welcomed by practicing lawyers in intellectual property rights and competition law as well as by academics think tanks and policymakers
