1 Basic Finance Concepts

Q What are the three main financial statements and how do they relate to each other

A The three main financial statements are the Income Statement Balance Sheet and Cash Flow Statement The Income Statement shows a company's revenues expenses and profits over a period The Balance Sheet shows a company's assets liabilities and shareholders equity at a specific point in time The Cash Flow Statement reconciles the beginning and ending cash balances by outlining cash inflows and outflows from operating investing and financing activities These statements are interconnected For example net income from the Income Statement feeds into the Shareholders Equity section of the Balance Sheet retained earnings and it also flows into the top line of the Cash Flow Statement starting point for operating cash flows

2 Valuation Techniques

Q Walk me through a discounted cash flow DCF analysis

A In a DCF we project a company's free cash flows over a period typically 5 10 years discount them to the present value using the company's weighted average cost of capital WACC and then calculate the terminal value The two components discounted free cash flows and terminal value give the enterprise value EV

Steps Project free cash flows for a set period Determine the terminal value using either the Gordon Growth Model or Exit Multiple Method Discount both the projected cash flows and the terminal value back to present value using WACC Add the discounted cash flows and terminal value to determine the company's enterprise value
