National Des Services de Rédaction Et Révision, 1998 *Handover in DVB-H* Xiaodong Yang, 2008-02-26 European industry has already developed successful standards in the past and I am very confident that on the basis of DVB H Mobile TV services can develop the economies of scale they need to take up across Europe and around the world. With these words of EU's Telecom Commissioner Viviane Reding DVB H is destined to be a dominating mobile TV technology in Europe and even in the world. I was first getting in touch with the DVB technology when I was doing my PhD research in Brunel University in UK in 2002. At that time DVB T was already a mature and widely used digital broadcast technology and anyone could easily buy a DVB T receiver in the market to try the digital broadcast signals that have been already broadcasted in UK since 1998. Then the DVB technology world changed dramatically. As a more flexible and robust terrestrial broadcast system targeting handsets DVB H was developed based on DVB T. In 2003 the DVB H community were continuously working to finalize the standard. Finally in November 2004 DVB H was adopted as an ETSI standard EN 302 304. I was lucky to see all these changes when I was doing my PhD research in DVB technology. And I was very proud to be involved in the different DVB H research projects since the beginning of the DVB H standard development stage. I was also lucky enough that I am one of the first persons who finished PhD degree by focusing on DVB H research. **Toxicological Profile for Xylenes**, 1995 **Guide to U.S. Government Publications**, 2008-08
