## **Technological Visions Technological Visions:**

**Technological Visions** Marita Sturken,Douglas Thomas,Sandra Ball-Rokeach,2004 Our hopes and dreams for new technologies  
**Knowledge Management in the Innovation Process** John de la Mothe,Dominique Foray,2012-12-06 It is now widely recognized that many of the central unresolved problems in economic policy management and research turn on questions of knowledge Increasingly complex firms and agencies must ask and answer such difficult questions as What is knowledge Where is it Who has it Does the organization lose or gain competitive advantage or effectiveness by sharing knowledge Where can we find the knowledge we need How can we measure knowledge In a knowledge based economy these queries are integral to the pursuits of every policy maker analyst and strategist Knowledge Management in The Innovation Process a joint project between Statistics Canada and Program of Research on Innovation Management and Economy PRIME at the University of Ottawa brings together economic social measurement and policy views on these critical issues This project fits into an ongoing research program at Statistics Canada to develop meaningful indicators for science technology and innovation in a technology intensive economy It also fits into the ongoing program at PRIME to better understand technology policy and innovation strategy This book tells the story of the dynamic interplay between knowledge and innovation with an eye to developing tools and frameworks for managing knowledge for social and economic benefit

Responsibility in Nanotechnology Development Simone Arnaldi,Arianna Ferrari,Paolo Magaudo,Francesca Marin,2014-07-08 This book disentangles the complex meanings of responsibility in nanotechnology development by focusing on its theoretical and empirical dimensions The notion of responsibility is extremely diversified in the public discourse of nanoscale technologies Addressed are major disciplinary perspectives working on nanotechnology e g philosophy sociology and political science as well as the major multidisciplinary areas relevant to the innovation process e g technology assessment and ethics Furthermore the interplay between such expertises disciplines and research programmes in providing a multidisciplinary understanding of responsibility is emphasized

**Handbook of Organizational Learning and Knowledge** Meinolf Dierkes,2003 In an era of far reaching changes organizational learning and knowledge creation are high on the agenda of social scientists managers and consultants worldwide as they seek to adapt to new environments The Handbook of Organizational Learning and Knowledge provides a comprehensive overview of how the concept of organizational learning emerged how it has been used and debated and where it may be going It summarizes the state of the art and provides a full account of the diverse approaches themes issues and debates of the field The handbook unites a distinguished team of international authors who examine both the central themes and key emerging issues The coverage extends beyond the American tradition to include the experiences of Europe Asia and the Middle East The book opens with chapters drawing insights from various social science approaches The following sections examine fundamental issues concerning the external triggers factors and conditions agents and processes of organizational learning Subsequent chapters

review the subject within a global context looking in particular at processes of interorganizational learning and knowledge transfer The next sections examine the development of learning practices and provide case studies to illustrate organizational learning and knowledge creation The book concludes with an analysis of the state of the art and an agenda for the future This handbook will be an invaluable reference tool for scholars and students in the social sciences as well as for professional involved in organizational development learning and change

The DARPA Model for Transformative Technologies: Perspectives on the U.S. Defense Advanced Research Projects Agency William Boone Bonvillian, Richard Van Atta, Patrick Windham, 2020-01-09 The authors have done a masterful job of charting the important story of DARPA one of the key catalysts of technological innovation in US recent history By plotting the development achievements and structure of the leading world agency of this kind this book stimulates new thinking in the field of technological innovation with bearing on how to respond to climate change pandemics cyber security and other global problems of our time The DARPA Model provides a useful guide for governmental agency and policy leaders and for anybody interested in the role of governments in technological innovation Dr Kent Hughes Woodrow Wilson International Center for Scholars This volume contains a remarkable collection of extremely insightful articles on the world s most successful advanced technology agency Drafted by the leading US experts on DARPA it provides a variety of perspectives that in turn benefit from being presented together in a comprehensive volume It reviews DARPA s unique role in the U S innovation system as well as the challenges DARPA and its clones face today As the American model is being considered for adoption by a number of countries worldwide this book makes a welcome and timely contribution to the policy dialogue on the role played by governments in stimulating technological innovation Prof Charles Wessner Georgetown University The U S Defense Advanced Research Projects Agency DARPA has played a remarkable role in the creation new transformative technologies revolutionizing defense with drones and precision guided munitions and transforming civilian life with portable GPS receivers voice recognition software self driving cars unmanned aerial vehicles and most famously the ARPANET and its successor the Internet Other parts of the U S Government and some foreign governments have tried to apply the DARPA model to help develop valuable new technologies But how and why has DARPA succeeded Which features of its operation and environment contribute to this success And what lessons does its experience offer for other U S agencies and other governments that want to develop and demonstrate their own transformative technologies This book is a remarkable collection of leading academic research on DARPA from a wide range of perspectives combining to chart an important story from the Agency s founding in the wake of Sputnik to the current attempts to adapt it to use by other federal agencies Informative and insightful this guide is essential reading for political and policy leaders as well as researchers and students interested in understanding the success of this agency and the lessons it offers to others

*Handbook of Technology Assessment* Armin Grunwald, 2024-10-03 This Handbook provides a comprehensive overview of technology assessment TA practices theories methods and cultures across the globe

Highlighting the significant influence of rapidly changing technology on human life and development it examines diverse perspectives on how TA can be developed to better meet the challenges of the future This title contains one or more Open Access chapters      **Hydrogen Energy** Paul Ekins,2010-08-12 Hydrogen could be a significant fuel of the future with the potential to make a major contribution to the resolution of pressing social and environmental problems such as carbon emissions energy security and local air pollution This book based on four years of detailed research subjects the promise and potential of hydrogen to searching in depth socio economic analysis It discusses the different technologies for the production distribution storage and use of hydrogen and analyses the economics of these technologies and their current market prospects It also describes various experiences with aspects of a hydrogen economy in two parts of the world the UK and Canada and then assesses the nature of different hydrogen futures that might develop depending on how the technology economics social acceptance and policy frameworks play out in different contexts The book ends by setting out the policy drivers and levers which could stimulate a virtuous circle of research and development innovation and investment that might ultimately generate a sustainable hydrogen economy This is essential reading for economists engineers business leaders investors policy makers researchers and students who are interested in the future of the energy system and the part that hydrogen might play in it

**Ethical Assessments of Emerging Technologies** Federica Lucivero,2015-11-13 This book systematically addresses the issue of assessing the normative nature of visions of emerging technologies in an epistemologically robust way In the context of democratic governance of emerging technologies not only it is important to reflect on technologies moral significance but also to address their emerging and future oriented character The book proposes an original approach to deal with the issue of plausible ethical evaluation of new technologies Taking its start from current debates about Technology Assessment the proposed solution emerges as a combination of theoretical and methodological insights from the fields of Philosophy of Technology Science and Technology Studies and a normative justification based on pragmatist ethics The book s main contribution is to engage a diverse and interdisciplinary audience ethicists philosophers social scientists technology assessment researchers and practitioners in a reflection concerning the epistemological challenges that are associated to the endeavour of appraising the moral significance of emerging technologies in the attempt of democratically governing them It brings together concepts and methodologies from different disciplines and shows their synergy in applying them to two specific case studies of emerging biomedical technologies

**Proceedings** ,2000      *Advances in Social Science and Computers* G. David Garson,Stuart S. Nagel,1996-02 This annual publication deals with how microcomputers and other computers can be applied to improving the explanatory and evaluative roles of modern social science Each volume contains chapters by experts in political science psychology sociology economics and computer science      Future Visions Philip Hayward,Tana Wollen,1993 No Marketing Blurb      **Between Heightened Confidence and Anxious Reservations** Julia Tscherpel,2023-05-16 Thesis M A from the year 2021 in the subject Sociology

Miscellaneous grade 1 0 Free University of Berlin Institute of Sociology language English abstract The thesis draws on the field of the sociology of expectations to highlight the role of shared societal expectations of AI in the diffusion of new technological innovation It adds to the list of globally shared societal expectations of AI that are described in past research and publications and analyses the communication of these expectations in twelve National AI Strategies Lending from communication studies lexical units that indicate positive or negative expectations regarding this disruptive technology are sought out to arrange countries according to their country specific vision of AI They are grouped according to whether they distribute a confident reserved or impartial vision of AI

Contemporary Issues in End User Computing Mo Adam Mahmood,2007 Contemporary Issues in End User Computing brings a wealth of end user computing information to one accessible location This collection includes empirical and theoretical research concerned with all aspects of end user computing including development utilization and management Contemporary Issues in End User Computing is divided into three sections covering Web based end user computing tools and technologies end user computing software and trends and end user characteristics and learning This scholarly book features the latest research findings dealing with end user computing concepts issues and trends

**Technology, Development, and Democracy** Haider Khan,1998 This work asks How can developing nations achieve cohesive national innovation systems which provide the foundations for technological progress and economic growth and in answer looks at a unified approach which draws upon economic political sociological and cultural factors

New Technology at the Outset Meinolf Dierkes,Ute Hoffmann,1992

*American Futurism in the Atomic Era* Gina Plumey,2019 This thesis examines the significance of marketed visions of the future following the Second World War on the American public Visions predictions and forecasted depictions of the world of the future collectively referred to as futurism highlighted the ways in which tomorrow would improve the quality of life for the average American citizen through innovative transportation methods sustainable urban environments space exploration and other technologies to ease the burdens of daily life This thesis argues how these visions were used as a tool to promote consumerism maintain nationalism and by the late 1950s through the 1960s stimulate interest in the space program The later was a government sponsored goal that represented the metaphorical strength of the nation and capitalism as an ideology On July 20 1969 two American astronauts landed on the surface of the Moon For the American population this moment involved a lead up which predated the creation of NASA and President Kennedy s announcement of getting American citizens to the Moon before the Soviets Businesses media corporations government agencies and artists utilized futurism to encourage Americans in their fiscal support which would aid in these visions becoming a reality Marketed futurism began in the 1920s and continued through the Second World War However the arrival of the Atomic Age Red Scare tactics and fears for the national economy during the Cold War provided an atmosphere which made these visions a plausible reality for the average American The overtly positive connotations of futurism are in reaction to the altered perceptions of science and technology following the

world's public introduction to nuclear technology. Therefore the democratization of science in the mid twentieth century as well as changes to the public discourse regarding science and technology provide an important aspect to the contextual equation which explains why futurism was pushed on the public and why Americans were so receptive to it throughout the space age. While this thesis can stand alone as a textual document it was originally composed on the digital platform Scalar and is best viewed there with the accompanying media and non linear structure. Media components and links referenced in this thesis are included in the full site <http://scalar.calstate.edu/american-futurism-in-the-atomic-era/index>

**Papers on Agricultural Technology** Steven M. Gendel, 1988      *Technical Education* Great Britain. Board of Education, 1901
