**Technology Security and National Power** Stephen D. Bryen, 2015-12-14 In *Technology Security and National Power* Stephen D Bryen shows how the United States has squandered its technological leadership through unwise policies Starting from biblical times he shows how technology has either increased national power or led to military and political catastrophe He goes on to show how the US has eroded its technological advantages endangering its own security The scope of *Technology Security and National Power* extends across 3 000 years of history from an induced plague in Athens to chemical weapons at Ypres to an atomic bomb on Hiroshima to the nuclear balance of terror It describes new weapons systems and stealth jets cyber attacks on national infrastructure the looting of America s defense secrets and much more The core thesis is supported by unique insight and new documentation that reaches into today s conflicted world More than a litany of recent failures and historical errors this book is a wake up call for political actors and government officials who seem unable to understand the threat *Technology Security and National Power* proposes that the United States can again become a winner in today s globalized environment *Parameters* ,2016

**Economic Security and Sino-American Relations** Kenneth Boutin, 2019 China and the United States have reached a crossroads where their economic relationship is concerned as the shared interest in economic prosperity and complementary economic strengths that provide the common ground of industrial collaboration are threatened by increasing attention to economic facets of national security This trend is encouraging policies which potentially undermine the basis of Sino American industrial integration This book explores the basis nature and impact of evolving economic security agendas in the United States and China *The Art of Peace* Juliana Geran Pilon, 2017-07-05 Sun Tzu author of *The Art of War* believed that the acme of leadership consists in figuring out how to subdue the enemy with the least amount of fighting a fact that America s Founders also understood and practiced with astonishing success For it to work however a people must possess both the ability and the willingness to use all available instruments of power in peace as much as in war US foreign policy has increasingly neglected the instruments of civilian power and become overly dependent on lethal solutions to conflict The steep rise in unconventional conflict has increased the need for diplomatic and other non hard power tools of statecraft The United States can no longer afford to sit on the proverbial three legged national security stool military diplomacy development where one leg is a lot longer than either of the other two almost forgetting altogether the fourth leg information especially strategic communication and public diplomacy The United States isn t so much becoming militarized as de civilianized According to Sun Tzu self knowledge is as important as knowledge of one s enemy if you know neither yourself nor the enemy you will succumb in every battle Alarminglly the United States is deficient on both counts And though we can stand to lose a few battles the stakes of losing the war itself in this age of nuclear proliferation are too high to contemplate [Encyclopedia of Cyber Warfare](#) Paul J.
