The Dynamics Of Enduring Rivalries:

The Dynamics of Enduring Rivalries Paul Francis Diehl, 1998 It's hard to think of Israel without also remembering the country's long standing problems with its Arab neighbors. Similarly India and Pakistan have long been less than cordial to each other. The concept of enduring rivalries and conflicts tantamount to militarized competition between two states is rapidly emerging as a subject of research in international relations. The nine contributors to *The Dynamics of Enduring Rivalries* place the concept in its empirical and theoretical context exploring how such rivalries arise, what influences their development and when and how they may escalate to war. *War and Peace in International Rivalry* Paul Diehl, Gary Goertz, 2010-06-02 This book provides the first detailed analysis of international rivalries, the long standing and often violent confrontations between the same pairs of states. The book addresses conceptual components of rivalries and explores the origins, dynamics and termination of the most dangerous form of rivalry, enduring rivalry, since 1816. Paul Diehl and Gary Goertz identify 1166 rivalries since 1816. They label sixty three of those as enduring rivalries. These include the competitions between the United States and Soviet Union, India and Pakistan, and Israel and her Arab neighbors. The authors explain how rivalries form, evolve and end. The first part of the book deals with how to conceptualize and measure rivalries and presents empirical patterns among rivalries in the period 1816-1992. The concepts derived from the study of rivalries are then used to reexamine two central pieces of international relations research, namely deterrence and democratic peace studies. The second half of the book builds an explanation of enduring rivalries based on a theory adapted from evolutionary biology, punctuated equilibrium. The study of international rivalries has become one of the centerpieces of behavioral research on international conflict. This book, by two of the scholars who pioneered such studies, is the first comprehensive treatment of the subject. It will become the standard reference for all future studies of rivalries. Paul F. Diehl is Professor of Political Science and University Distinguished Teacher Scholar, University of Illinois. He is the coeditor of *Reconstructing Realpolitik* and coauthor of *Measuring the Correlates of War*. Gary Goertz is Assistant Professor of Political Science, University of Arizona, and is the coauthor with Paul Diehl of *Territorial Change and International Conflict*.

Dynamics of Asymmetric Territorial Conflict U. Resnick, 2013-07-12 This book provides a comprehensive study of asymmetric territorial conflict, combining game theory, statistical empirical analysis and historiographic analysis. Using the Israeli-Palestine conflict as a case study, it tests the model on a database of almost four hundred territorial conflicts.
