## **The Dyscalculia Assessment:**

**The Dyscalculia Assessment** Jane Emerson, Patricia Babbie, 2010-09-02 The Dyscalculia Assessment is a tool for investigating pupils numeracy abilities. It is designed to inform a personalised teaching programme for individuals or small groups of pupils who have difficulties with numbers. The assessment was devised at Emerson House, a specialist centre in London supporting pupils with difficulties in numeracy and literacy. The bestselling first edition of the book written by Jane Emerson and Patricia Babbie was the winner of the ERA Best Special Educational Needs Resource 2011. This fully revised and updated second edition features a brand new design making the step by step assessment even easier to navigate and use with SENCOs or those with no specific special needs training. The suggested script for each stage of the investigation that runs alongside the photocopiable assessment sheets make this book an extremely user friendly accessible teaching and learning resource. This book also includes an introduction to dyscalculia and co-occurring conditions, guidance on how to conduct the assessment including tips on behaviours to look out for, information on the equipment you need and how to use it, instructions on how to interpret the results of each stage of the assessment and how to produce a personalised teaching plan, games and activities to engage the pupils and reinforce numeracy skills. The Dyscalculia Assessment is ideal for use with primary school children but can easily be adapted for older students and is invaluable for SENCOs, TAs, educational psychologists and mainstream teachers keen to support students with numeracy difficulties in their class. [The Dyscalculia Assessment](#) Jane Emerson, Patricia Babbie, 2014-04-10 A complete assessment tool for investigating maths difficulties in children, this book also provides advice for implementing the findings into teaching plans. *The Dyscalculia Solution* Jane Emerson, Patricia Babbie, 2014-12-08 This new book by authors Jane Emerson and Patricia Babbie follows on from their award winning book *The Dyscalculia Assessment*. Once careful assessment has identified the particular numeracy difficulties your pupils may have, *The Dyscalculia Solution* provides a practical teaching guide for addressing and solving those difficulties. *The Dyscalculia Solution* includes step by step instructions on how to teach pupils to use whole numbers by talking and reasoning about them and communicating their thinking in a verbal, diagrammatic and written form. The book includes scripts to emphasise the importance of using the correct language to develop numerical thinking as well as teaching objectives, activities and games which are important for fostering a positive attitude to numeracy. Each new concept builds on previous understanding so that new facts are derived by reasoning from known facts. *The Dyscalculia Solution* is ideal for use with primary school children but can easily be adapted for older students and is invaluable for SENCOs, TAs, educational psychologists and mainstream teachers keen to support students with numeracy difficulties in their class. Accompanying materials in both print and electronic formats to support busy teachers by providing lesson plans and worksheets are available with this book. **The Maths and Dyscalculia Assessment** Robert Jennings, Jane Emerson, 2025-07-21 An easy to use maths and dyscalculia assessment aimed at pupils aged between 6 to 18.
