Grab your copy now [\*\*PROMPTING - Talking with AI\*\*](#) Aaron Newton, 2024-08-08. This book aims to make the world of generative artificial intelligence accessible to everyone, even the less tech savvy, in an informal and friendly language. It is not a technical manual for programmers. Instead, it's a practical guide to understanding and making the best use of tools such as ChatGPT. The book explains how generative AI, while appearing human and intelligent, is actually based on algorithms and statistics. The learning mechanisms of AI based on processing huge amounts of textual data and how these influence the responses it provides are described. Some common myths about generative AI, such as its alleged dangerousness or ability to feel emotions, are debunked. The book guides the reader through the different AI platforms available, such as ChatGPT, Claude, and Perplexity, highlighting their features, language models used, costs, and functionality. The different types of prompts, i.e., requests that can be made to AI and strategies for making them more effective, are described. The final part of the book teaches you how to use a universal super prompt to improve the quality of requests made to the AI. The book also covers generative AI in graphics, music, and video by providing the basic guidance needed to achieve good results in these areas as well. Advice is given on how to apply AI in daily life, study, and work. Through concrete examples, the book helps the reader understand how generative AI can be a useful tool in a variety of areas, from creative writing to information retrieval from translation to programming. The aim is to provide the reader with the tools to use AI consciously and responsibly, making the most of its potential.
