sensing technology which involves sensors embedded in smartphones including the accelerometer gyroscope speaker microphone etc can be applied in sensing vehicle dynamics and driving behaviors Chapter 4 exploits the feasibility to recognize abnormal driving events of drivers at early stage Specifically the authors develop an Early Recognition system ER which recognize inattentive driving events at an early stage and alert drivers timely leveraging built in audio devices on smartphones An overview of the state of the art research is presented in chapter 5 Finally the conclusions and future directions are provided in Chapter 6
