### **Deploying Artificial Intelligence to Achieve the UN Sustainable Development Goals** Arthur Guseni Oliver

Mutambara, 2025-07-01 This book provides research insights into how Artificial Intelligence AI can be used to achieve the UN's Sustainable Development Goals SDGs 17 interconnected goals designed to address the world's most pressing challenges by 2030. It reviews the SDGs and discusses why progress has been mixed and uneven across different countries, regions, and goals. The book posits that attaining the SDGs will depend on enhanced global cooperation, increased funding, improved infrastructure, public-private partnerships, regional/continental integration, addressing the climate crisis, inclusive economic transformation, and visionary leadership. More specifically, the publication advocates leveraging innovative and transformative technologies, particularly the deployment of AI. The research acknowledges the risks of digital imperialism, data colonialism, and technological exclusion, especially in emerging and least industrialised economies. Hence, in deploying AI to achieve the SDGs, the book puts a premium on decoloniality in AI systems and democratising AI technology. Provides a critique of the current SDGs approach by reframing the goals as a comprehensive risk assessment of humanity's most pressing threats in the 21st century. Features broad and holistic interventions to accelerate the attainment of the SDGs. Provides a comprehensive but accessible introduction to AI concepts and advanced innovations such as AlphaFold, ChatGPT 4, DeepSeek R1, Grok 3, and autonomous vehicles, drones, and driverless cars. Discusses the AI strategies of leading economies and assesses the impact of AI on geopolitics. Provides a comprehensive critique of global AI efforts by the UN and African Union while proffering alternative paradigms and frameworks. Presents the enablers, drivers, and strategic framework of AI deployment to achieve the SDGs. Develops and presents details of six distinct but related components of a novel Strategic Framework for developing and adopting AI: Vision, Strategy, Policy, Governance, Legislation, Regulations, and Implementation Matrix. Outlines specific ways that AI can be deployed to achieve each of the 17 SDGs and reviews seven countries' experiences. Explores an innovative, forward-looking, and technology-driven framework for equitable global socio-economic transformation to succeed the SDGs post 2030. Innovative Applications and Changing Framework in Digital Broadcasting Bolat, Nursel, 2025-06-10

In conjunction with digitalization, the media and publishing sector has undergone a radical transformation, paving the way for new content production and consumption norms. The traditional broadcasting approach is being replaced by more flexible, accessible, and user-oriented models using the opportunities provided by technology. Artificial intelligence-supported algorithms offer personalized content recommendations, while big data analytics enable a better understanding of user behavior and shape content strategies accordingly. At the same time, the proliferation of smart devices and the increase in high-speed internet access have eliminated the physical boundaries of broadcasting and made it possible to reach a global audience. Innovative Applications and Changing Framework in Digital Broadcasting examines in depth the impact of innovative practices in digital broadcasting on the sector and analyzes how these effects redefine the traditional framework.
