Flashcards for practice testing

Develop a system to support your individual students through flashcards when revising.

- Flash cards will support an on-the-spot revision activity.
- Working through them during the lesson ensures that a new idea is reinforced and that it sticks in the long term.
- Hand the cards out at the end of the lesson and ask students to bring them back to the start of the next lesson.

Test on the cards and working through the responses in 10 stages. Ask students to write down the number of cards they got right. Then, ask them to write down the number of cards they got wrong. This will help them to identify the areas they need to focus on.

Worked examples for practice testing

Use students' own working books to create worked examples. A new idea is reinforced and that it sticks in the long term.

Revising past papers is a key strategy for students to ensure they are confident in the areas they are weak in. This can be done by using the worked examples to create a new set of questions for the students to answer.

Test your working book answers against the worked examples to ensure that you have understood the concepts correctly. This will help you to identify the areas you need to focus on.
