don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online. Upload your videos on YouTube or Vimeo for example and upload your files. The documents can be Portable Document Format (PDFs), Word docs, Power Point, Spreadsheets, and any other documents recognized by Google Docs on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com but that works fine; it works as well if they are on any other website, but you have to enter the full path of the file. You can define, configure, and embed any number of jQuery images, sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and directions into your site. You can define and configure file packages; they can contain any number of files the visitors can download for free or for money. PayPal payment is included. You can define, configure, and embed Community Builder advanced searches. This component works with any CB version. Since JEmbedAll version 1.3, the search results can open in the same window, in a different window, or in a modal window. Beyond that, you can give every user several powerful tools: they can save the search forms and search results; they can embed that saved search results as users lists; they can use CB privacy, a tool that restricts access to some fields or even the users on searches. You can embed Facebook pages, posts, videos, and images depending on the Facebook privacy; in many cases, all this has to be public for everyone to see, but you can also embed some plugins: Facebook activity, comments, facepile, likebox, and recommendations. Starting with the 1.5 version, you can generate and download e-books based on your website content. The PayPal payment was modified and extended; you can create shopping carts for files you want to sell and the generated e-books.

FileMaker Pro 10: The Missing Manual Susan Prosser, Geoff Coffey, 2009-01-23. The FileMaker Pro 10 desktop database lets you do almost anything with the information you give it, especially with this book as your guide. Clear, thorough, and accessible, *FileMaker Pro 10: The Missing Manual* helps you get in, build your database, and get the results you need, whether you're running a business, pursuing a hobby, or planning your retirement. It's the ideal guide for non-technical and experienced folks alike. Each chapter in this fully updated edition covers the latest timesaving features of FileMaker Pro 10, including saved finds and a redesigned toolbar that reveals information and features more clearly than ever. You'll learn how to import information from the new Bento consumer database. Mac only: write scripts to make your database even easier to use and send email without leaving FileMaker. With this book, you will get your first database running in minutes and perform basic tasks right away: catalog people, processes, and things with streamlined data entry and sorting tools; use your data to generate reports, correspondence, and other documents with ease; create, connect, and manage multiple tables and set up complex relationships that display just the data you need; crunch numbers; search text or pin down dates and times with dozens of built-in formulas; outfit your database for the Web and import and export data to other formats. You'll also get objective advice on which features are really useful and which aren't. To make the most of this database, you need *FileMaker Pro 10: The Missing Manual*, the book that should have been in the box.
