Work in this direction must consider the strong interdependencies between the various critical functions and services including financial services, the key role of the private sector, the changing security environment and emerging risks both in the physical and cyber fields. In addition to legal requirements agreements should be promoted with private sector infrastructure and service owners and operators to ensure the continuity of and access to critical services including beyond force majeure by ensuring an acceptable level of preparedness to respond to all relevant threats as well as the flexibility to address and mitigate the effects of low probability high impact events **The Rough Guide to Internet** Peter Buckley,Duncan Clark,2005-09 This guide to the Internet covers everything you need to know from getting connected to building your own Web page.
