*Ethics of Virtual Reality* Michael J. Grabowski, 2024-12-15 In this book Michael Grabowski draws on established theories of ethics to consider critical questions surrounding the growing adoption of virtual reality VR technologies. These questions include who should control and have access to VR, its impact on privacy, its potential for misrepresentation and bias, and how to provide a platform for free expression while mitigating harassment and abuse. Grabowski examines use cases of other digital technologies including social media and artificial intelligence to examine who is helped and harmed by the widespread implementation of VR and how it might transform existing institutions, social relationships, and communication. Finally, Grabowski forecasts the possible futures of VR and what limits, if any, should be placed on representing the real world or imagining new ones. Scholars of media studies, technology studies, communication, and ethics will find this book of particular interest.

**Sell Smarter** James L. Murray, 2026-02-23 *Sell Smarter* provides insights on the overlap between artificial and emotional intelligence and the challenges for leadership, especially in sales. Today's buyers and sellers stand at the threshold of transformation, equipped to harness data, empathy, and technology to elevate every interaction. In this new era of AI, business models decisions unfold with confidence and speed, driven by sharper insights and a richer understanding of what truly matters.

*Management in a Dynamic Environment* Rico Baldegger, 2025-10-30 This open access book provides basic management knowledge in a concise and structured way. Fundamental aspects of management are described, based on which a model of the enterprise is outlined. This allows readers to find their way around, easily reflect, set new approaches in context, and examine them critically. The practical examples, interpretation questions, and the short case studies at the end of each chapter facilitate the transition from theory to practice. Sustainability, corporate responsibility, and circular business have been extended for this second edition. Current practical examples have been included, e.g. UBS merger, Rolex, Nestl, Logitech, Netflix, Ferrero, and company examples have been updated or replaced. In addition, the company model has been adapted, media have been added as stakeholders, and the environmental spheres according to PESTEL have been included. The chapter on corporate culture has been extended with additional models which rely on concepts of leadership style. This textbook has been recommended and developed for university courses in Germany, Austria, and Switzerland. In addition, novice and experienced managers will find new inspiration and practical guidance supported by compelling examples.

**A New Global Geometry?** Greg Albo, 2024-06-18 Scrutinizes possibilities for an equalised global order in light of recent conflicts between the world's major powers. The post-Cold War era is definitively over, asserted US President Joe Biden as he launched the new National Security Strategy warning in late 2022 that a competition is underway between the major powers to shape what comes next. American leadership, the document declared, would be more necessary than ever to define the future of the international order, insisting that the US must marshal its unparalleled economic, military, and diplomatic resources to confront its geopolitical rivals. Socialist Register 2024 *A New Global Geometry* takes stock of momentous changes on the

horizon Even if these geopolitical shifts do not spell the end of globalization how might they alter its historical trajectory While it is it premature to speak of the end of the liberal economic order let alone the development of a multipolar international system can we begin to assess the dimensions of a new global geometry And how might we assess the potential vulnerabilities of socialist movements worldwide alongside the potential resistance our movements might manage to present grounded in our historical demands for a democratic and equalizing world order
