Macula, Connie Campbell Dierking, Becky McTague, Mary C. McMackin, Nancy Witherell, Kristin Lems, Elaine Weber, 2017-06-06 Teaching English language arts at grades K-5 is both a science and an art. Educators must teach literacy skills and content with best practices while also keeping focus on each student's individual needs. They are challenged to monitor students working independently while also conducting small group instruction. And they must focus on providing differentiated support with a rather complicated text. With increased attention to rigor requirements and personalized instruction, it can be a challenge to make sure all students are receiving instruction that is just right. *Comprehensive Literacy Basics: An Anthology* by Capstone Professional contains useful tips to support educators. Chapters focus on each part of the literacy and language arts block including whole group, small group, writing, and differentiation. A collection of expert authors specializing in literacy and language arts instruction contributed chapters to the book. Reading Wellness Jan Burkins, Kim Yaris, 2023-10-10 With so many state standards and demands of accountability, it can be a challenge for teachers to teach in ways that create energy and enthusiasm for reading. In their book *Reading Wellness: Lessons in Independence and Proficiency*, authors Dr. Jan Burkins and Kim Yaris want to reignite the passion in teachers and drive them to instill confidence, curiosity, and joy in students. Burkins and Yaris define reading wellness to include all aspects of readership so we can be our best reading selves. The book is built around a framework of four intentions: alignment, balance, sustainability, and joy. It includes a series of field tested lessons that help children read closely and carefully while still honoring their interests, passions, and agency as readers. *Reading Wellness* encourages each teacher to shape these ideas in ways that support personal ideals and goals while nurturing a love of reading and a passion for lifelong learning.

"I Hate Reading" Justin M. Stygles, 2022-09-19 It can take a lifetime to eradicate a reader's shame, or it can take one great teacher. Shame-bound readers want someone to notice them. It's true. But then what does a teacher do to help students? Justin Stygles found fresh answers in Gershen Kaufman's seminal research on shame and applied it to his teaching. The results proved to him and now us that building relationships and taking deliberate actions to alleviate shame is crucial. With this remarkable book, Stygles shows us how to build an interpersonal bridge with students and make vulnerability okay. But make no mistake: disengaged readers need to feel competent before they fully buy in, and so the author packs the book with powerful instructional ideas. Learn to spot all the distress signals, including withdrawal, perfectionism, and compliance. Help students see that they are not permanently locked out of a reading life. Use assessment instruments to note and celebrate incremental change. Plan mini units that develop skills in concert with engagement. Design small group experiences that are free of levels and other shame-inducing labels. Pump up independent reading with scaffolding and sociability. Harness writing about reading to convince students of their uniqueness. The shame factor is real. It's time we meet it head on with innovation and the best thinking from multiple research fields. *I Hate Reading* is the tool that does just that.

and Literary Understanding Joyce Many, Carole Cox, 1992 This book presents background information on the current literary theory known as reader response and examines ways in which response and the teaching of literature has been researched and the findings of that research. It effectively demonstrates the diverse manner in which theoretical principles can be examined using a number of different frameworks. It investigates new theoretical perspectives on reader response theory as well as demonstrating how empirical qualitative and ethnographic research has investigated current theory. Each chapter on research response to literature integrates classroom vignettes and actual student responses in order to offer the classroom teacher as well as the reading and literature research new information about the manner in which children and older students interact with the literature. This volume will be particularly informative to college personnel and graduate students interested in theories and research focusing on response to literature and the teaching of literature. This text is useful as both a reference for researchers and teachers and a supplemental text for graduate students.

Dynamic Teaching for Deeper Reading

Vicki Vinton, 2017 How do we prepare students for a world that is changing so rapidly that a majority of those sitting in classrooms today will go on to hold jobs that don't yet exist using technologies that haven't yet been invented to solve problems we don't even know are problems yet? For Vicki Vinton the answer is to help build students' capacities as critical and creative thinkers by shifting to a problem based approach for teaching reading. Problem based teaching has taken hold in STEM classes across the country but it's not common in reading where we tend to think of problems as existing only at the word level. Dynamic Teaching for Deeper Reading, however, will help you become more aware of the problems texts pose for readers at the literal, inferential, and thematic levels and then show you how to create opportunities for students to read closely and think deeply as they wrestle with those problems. Additionally, you'll learn how to Develop a repertoire of dynamic teaching moves that will help you probe student thinking and provide responsive feedback when students most need it. Shift your focus from the teaching of complex texts to complex thinking. Help students develop lines of inquiry as readers. Chock full of classroom examples and the voices of students figuring things out, Dynamic Teaching for Deeper Reading connects the practices in the book to all sorts of current thinking and trends from growth mindsets to the Common Core State Standards and from productive struggle to educational neuroscience. That breadth and depth ensures that Vicki's book is one that educators will be talking about and you don't want to miss.
