A small boat is visible on the left side of the river. The word "WHENCE" is written in large, white, bold letters across the center of the image.

G. Green, revised by G. A. Jacob and R. A. Girdlestone]. Secretary of State, 1913 **Studies in Chinese Philosophy and Philosophical Literature** Angus Charles Graham, 1990-01-01 Graham addresses several fundamental problems in classical Chinese philosophy and in the nature and structure of the classical Chinese language These inquiries and reflections are both broad based and detailed Two sources of continuity bring these seemingly disparate parts into a coherent and intelligible whole First Graham addresses that set of fundamental philosophical questions that have been the focus of dispute in the tradition and that have defined its character What is the nature of human nature What can we through linguistic and philosophical scrutiny discover about the date and composition of some of the major texts What sense can we make of the Kung sun Lung sophistries A second source of coherence is Graham s identification and articulation of those basic and often unconscious presuppositions that ground our own tradition By so doing he enables readers to break free from the limits of their own conceptual universe and to explore in the Chinese experience a profoundly different world view **Space in Diachrony** Silvia Luraghi, Tatiana Nikitina, Chiara Zanchi, 2017-08-14 Space is a fundamental dimension of human life and is pervasive in human experience Research on space has highlighted the possible asymmetrical nature of spatial relations Differences in the encoding of goals and sources of motion are a case in point and cross linguistic coding tendencies show that path is less frequently flagged by a dedicated case than goal source origin and

static location locative Interestingly such asymmetries may correlate with certain types of landmark as in the case of toponyms or of animate entities Even though these issues have been focused upon both in typological and psycholinguistic research they remain largely open The papers in this collection aim to show that a diachronic approach may shed light on the way in which asymmetries in the space domain come about over time thus contributing to the clarification of synchronically puzzling facts
