Beginner's Guide to Medical Application Development with Deep Convolutional Neural Networks Snehan Biswas,Amartya Mukherjee,Nilanjan Dey,2024-12-02

This book serves as a source of introductory material and reference for medical application development and related technologies by providing the detailed implementation of cutting edge deep learning methodologies. It targets cloud based advanced medical application developments using open source Python based deep learning libraries. It includes code snippets and sophisticated convolutional neural networks to tackle real world problems in medical image analysis and beyond. Features: Provides programming guidance for creation of sophisticated and reliable neural networks for image processing. Incorporates the comparative study on GAN stable diffusion and its application on medical image data augmentation. Focuses on solving real world medical imaging problems. Discusses advanced concepts of deep learning along with the latest technology such as GPT stable diffusion and ViT. Develops applicable knowledge of deep learning using Python programming followed by code snippets and OOP concepts. This book is aimed at graduate students and researchers in medical data analytics, medical image analysis, signal processing and deep learning.

[Guide for establishing and maintaining knowledge networks](#) World Health Organization,2025-05-07 The purpose of this guide is to support public health practitioners and other relevant stakeholders in creating adaptable, effective, engaging and sustainable knowledge networks that promote peer learning and knowledge exchange. By combining theoretical frameworks with practical tools, good practices and concrete examples, this guide serves as a step by step resource for the establishment, launch and management of knowledge networks, ensuring continuous learning and collaboration throughout the life cycle of the network. This guide was developed by the World Health Organization (WHO) in collaboration with individuals and institutions from each region with solid experiences in peer to peer learning and knowledge management tools and strategies. This work is a contribution of the WHO Health Emergencies Programme to the professionalization of the emergency workforce worldwide as knowledge networks provide important channels for collaboration and learning among geographically dispersed teams who wish to strengthen their response to public health threats and outbreaks.
