**Journal of the Senate, State of Florida** Florida. Legislature. Senate,2013 **Is There Something Else Wrong with the FCAT?** Terry Froman,2007 Because 3rd Grade Florida Comprehensive Assessment Test FCAT scores have a direct impact on promotion the results for that grade level are released early by the State When the FCAT results for 3rd Grade were released in May 2007 many people were troubled Over 80% of the elementary schools in the Miami Dade School District showed a decrease in the percentage of students scoring in Levels 3 and above in Reading Similar trends produced an outcry across the state After an 8 percentage point jump in the previous year there was a statewide drop of 6 percentage points in 2007 These results were more than surprising and cast doubt on the soundness of the scoring process After a careful review the Education Commissioner announced that there did appear to be a problem in the scoring of the test and a rescaling of the 3rd Grade FCAT reading exam would be forthcoming This admission by the State while honorable and praiseworthy opened the door for many to question other aspects of the FCAT test sometimes without just cause While it is clearly unfair to discount the overall precision and usefulness of the FCAT some form of careful review of scores is nonetheless proper The search for the same kind of irregular trends in the data that brought this type of problem to the surface is always warranted and should be welcomed Any abnormalities revealed in the examination of the scores need to be made public so that the need for in depth analysis can be considered It is in that spirit that this paper presents some unusual patterns in the data for FCAT Reading at the middle school level

**FCAT Retrospective** Terry Froman,Vilma Rubiera,Aleksander Shneyderman,2006 The Florida Comprehensive Assessment Test FCAT is the primary measure of student achievement applied to the grading of the Florida public schools School grades utilize a point system in which schools are awarded one point for every percent of students 1 scoring in achievement levels 3 5 in Reading 2 demonstrating learning gains in Reading 3 in the lowest 25% of Reading making gains 4 scoring in achievement levels 3 5 in Mathematics 5 demonstrating learning gains in Mathematics and 6 scoring 3 5 or above in Writing Each school gets points toward their school grade in direct proportion to the number of students meeting the standards in six different component areas This paper depicts the changes in FCAT points earned toward school grades in both the District and the State over the last three years In all component except Writing where standards were raised in 2005 the District has demonstrated greater gains than the State and in some components exceeded the State s performance It is important to exercise caution in attributing changes in student achievement to specific causes There are a great many of potential influences on achievement and in many cases trends in the district seem to be paralleled by similar trends across the state However the improvements observed over the past three years in achievement scores and school grades are hard to interpret as anything but substantial improvement for the district
