**Teaching Young Learners in Bilingual Settings** Paul

Berge, 2024-09-23 Bilingual education or CLIL at primary school varies greatly across European educational contexts. Teaching Young Learners in Bilingual Settings reports on a study that explored one such CLIL context in Dortmund Germany. Through interviews and classroom observations the researcher and author sought not only to document some of what takes place in CLIL classrooms but to describe and understand teachers thoughts and beliefs about their CLIL teaching practices. This research contributes to a better understanding of primary school CLIL programs and teachers and is relevant for researchers working in the fields of foreign language education bilingual education and language teacher cognition research. Furthermore the insights into CLIL teachers thinking can support CLIL teachers administrators and policy makers as they seek to further develop CLIL pedagogy and programs

**High Performance Computing for Big Data** Chao

Wang, 2017-10-16 High Performance Computing for Big Data Methodologies and Applications explores emerging high performance architectures for data intensive applications novel efficient analytical strategies to boost data processing and cutting edge applications in diverse fields such as machine learning life science neural networks and neuromorphic engineering. The book is organized into two main sections. The first section covers Big Data architectures including cloud computing systems and heterogeneous accelerators. It also covers emerging 3D IC design principles for memory architectures and devices. The second section of the book illustrates emerging and practical applications of Big Data across several domains including bioinformatics deep learning and neuromorphic engineering. Features: Covers a wide range of Big Data architectures including distributed systems like Hadoop Spark. Includes accelerator based approaches for big data applications such as GPU based acceleration techniques and hardware acceleration such as FPGA CGRA ASICs. Presents emerging memory architectures and devices such as NVM STT RAM 3D IC design principles. Describes advanced algorithms for different big data application domains. Illustrates novel analytics techniques for Big Data applications scheduling mapping and partitioning methodologies. Featuring contributions from leading experts this book presents state of the art research on the methodologies and applications of high performance computing for big data applications. About the Editor: Dr Chao Wang is an Associate Professor in the School of Computer Science at the University of Science and Technology of China. He is the Associate Editor of ACM Transactions on Design Automations for Electronics Systems TODAES Applied Soft Computing Microprocessors and Microsystems IET Computers Digital Techniques and International Journal of Electronics. Dr Chao Wang was the recipient of Youth Innovation Promotion Association CAS ACM China Rising Star Honorable Mention 2016 and best IP nomination of DATE 2015. He is now on the CCF Technical Committee on Computer Architecture CCF Task Force on Formal Methods. He is a Senior Member of IEEE Senior Member of CCF and a Senior Member of ACM.
