## **Targeting In Social Programs Avoiding Bad Bets Removing Bad Apples:**

**Targeting in Social Programs** Peter H. Schuck, Richard J. Zeckhauser, 2007-08-29 Should chronically disruptive students be allowed to remain in public schools? Should nonagenarians receive costly medical care at taxpayer expense? Who should be first in line for kidney transplants: the relatively healthy or the severely ill? In *Targeting in Social Programs* Peter H. Schuck and Richard J. Zeckhauser provide a rigorous framework for analyzing these and other difficult choices. Many government policies seek to help unfortunate, often low-income individuals; in other words, bad draws. These efforts are frequently undermined by poor targeting, however. In particular, when two groups of bad draws—bad bets and bad apples—are included in social welfare programs, bad policies are likely to result. Many politicians and policymakers prefer to sweep this problem under the rug. But the costs of this silence are high: Allocating resources to bad bets and bad apples does more than waste money; it also makes it harder to achieve substantive goals such as the creation of safe and effective schools. And perhaps most important, it erodes support for public programs on which many good bets and good apples rely. By training a spotlight on these issues, Schuck and Zeckhauser take a first step toward much-needed reforms. They dissect the challenges involved in defining bad bets and bad apples and discuss the safeguards that any classification process must provide. They also examine three areas where bad apples and bad bets loom large: public schools, public housing, and medical care, and propose policy changes that could reduce the problems these two groups pose. This provocative book does not offer easy answers, but it raises questions that no one with an interest in policy effectiveness can afford to ignore. By turns incisive and probing, *Bad Draws* will generate vigorous debate.

*Targeting in Social Programs* Peter H. Schuck, Richard J.

Zeckhauser, 2006-11-09 Provides a framework for analyzing the challenges involved in defining bad bets and bad apples and discusses the safeguards that any classification process must provide. Examines public schools, public housing, and medical care, and proposes policy changes that could reduce the problems these two groups pose in social welfare programs. Provided by publisher

**Using Typological Approaches to Understand College Student Experiences and Outcomes** Shouping Hu, Shaoqing Li, 2011-12-20 Facing a new round of criticisms on the quality of undergraduate education in American colleges and universities, higher education administrators are eager to find or create effective programs and practices that can enrich student experiences and enhance outcomes. In order to do that, those who work at colleges and universities need to have a better understanding of their students. Institutional researchers with access to a wealth of student data have the analytical expertise to supply information that can guide institutional policy and practice. Typological frameworks particularly can be used to generate such information, and this volume presents rich examples of typological approaches to the study of college students. Typological research can reveal patterns in students' characteristics, attitudes, and behaviors, and how those patterns are related to desirable outcomes such as learning and persistence or to the nature, meaning, and utility of student-faculty interactions outside the classroom. Such information can help campus leaders and other concerned groups gain a deeper

understanding of their students design better targeted and intentional interventions to optimize student experiences and maximize student learning and personal development outcomes This is a special supplemental issue of New Directions for Institutional Research Always timely and comprehensive this series provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management    **The Three Circles of War** Heather S. Gregg, John Arquilla, Hy S. Rothstein, 2010 The conflict in Iraq is characterized by three faces of war interstate conflict civil war and insurgency The Coalition's invasion of Iraq in March 2003 began as an interstate war No sooner had Saddam Hussein been successfully deposed however than U.S. led forces faced a lethal insurgency After Sunni al Qaeda in Iraq bombed the Shia al Askari Shrine in 2006 the burgeoning conflict took on the additional element of civil war with sectarian violence between the Sunni and the Shia The most effective strategies in a war as complicated as the three level conflict in Iraq are intertwined and complementary according to the editors of this volume For example the surge in U.S. troops in 2007 went beyond an increase in manpower the mission had changed giving priority to public security This new direction also simultaneously addressed the insurgency as well as the civil war by forging new trusting relationships between Americans and Iraqis and between Sunni and Shia This book has broad implications for future decisions about war and peace in the twenty first century    **Why Government Fails So Often**

Peter H. Schuck, 2015-08-25 From healthcare to workplace conduct the federal government is taking on ever more responsibility for managing our lives At the same time Americans have never been more disaffected with Washington seeing it as an intrusive incompetent wasteful giant The most alarming consequence of ineffective policies in addition to unrealized social goals is the growing threat to the government's democratic legitimacy Understanding why government fails so often and how it might become more effective is an urgent responsibility of citizenship In this book lawyer and political scientist Peter Schuck provides a wide range of examples and an enormous body of evidence to explain why so many domestic policies go awry and how to right the foundering ship of state Schuck argues that Washington's failures are due not to episodic problems or partisan bickering but rather to deep structural flaws that undermine every administration Democratic and Republican These recurrent weaknesses include unrealistic goals perverse incentives poor and distorted information systemic irrationality rigidity and lack of credibility a mediocre bureaucracy powerful and inescapable markets and the inherent limits of law To counteract each of these problems Schuck proposes numerous achievable reforms from avoiding moral hazard in student loan mortgage and other subsidy programs to empowering consumers of public services simplifying programs and testing them for cost effectiveness and increasing the use of big data The book also examines successful policies including the GI Bill the Voting Rights Act the Earned Income Tax Credit and airline deregulation to highlight the factors that made them work An urgent call for reform Why Government Fails So Often is essential reading for anyone curious about why government is in such disrepute and how it can do better    *How to House the Homeless* Ingrid Gould

Ellen,Brendan O'Flaherty,2010-06-24 How to House the Homeless editors Ingrid Gould Ellen and Brendan O Flaherty propose that the answers entail rethinking how housing markets operate and developing more efficient interventions in existing service programs The book critically reassesses where we are now analyzes the most promising policies and programs going forward and offers a new agenda for future research How to House the Homeless makes clear the inextricable link between homelessness and housing policy Contributor Jill Khadduri reviews the current residential services system and housing subsidy programs For the chronically homeless she argues a combination of assisted housing approaches can reach the greatest number of people and specifically an expanded Housing Choice Voucher system structured by location income and housing type can more efficiently reach people at risk of becoming homeless and reduce time spent homeless Robert Rosenheck examines the options available to homeless people with mental health problems and reviews the cost effectiveness of five service models system integration supported housing clinical case management benefits outreach and supported employment He finds that only programs that subsidize housing make a noticeable dent in homelessness and that no one program shows significant benefits in multiple domains of life Contributor Sam Tsemberis assesses the development and cost effectiveness of the Housing First program which serves mentally ill homeless people in more than four hundred cities He asserts that the program's high housing retention rate and general effectiveness make it a viable candidate for replication across the country Steven Raphael makes the case for a strong link between homelessness and local housing market regulations which affect housing affordability and shows that the problem is more prevalent in markets with stricter zoning laws Finally Brendan O Flaherty bridges the theoretical gap between the worlds of public health and housing research evaluating the pros and cons of subsidized housing programs and the economics at work in the rental housing market and home ownership Ultimately he suggests the most viable strategies will serve as safety nets social insurance to reach people who are homeless now and to prevent homelessness in the future It is crucial that the links between effective policy and the whole cycle of homelessness life conditions service systems and housing markets be made clear now With a keen eye on the big picture of housing policy How to House the Homeless shows what works and what doesn't in reducing the numbers of homeless and reaching those most at risk

Schuck,Matthew Matera,David I. Noah,2011 The paper introduces the topic of suspensions by summarizing earlier work Schuck race gender student test scores in English and mathematics school performance grades awarded by the NYC Department of Education and number of suspensions per year The analysis demonstrates a general trend of increasing suspensions with the absolute number and proportions at individual schools often varying over the relevant time period including some large year to year fluctuations The data is organized to depict common patterns of suspension trajectories in four stylized types of schools The analysis then shows that some students are suspended often in a single school year and are responsible for a disproportionate share of total suspensions in individual schools and in the system as a whole Specifically more than 128 students were suspended ten or more times in one school year over the past five years indeed three of those students were suspended ten or more times in two different school years Based on a preliminary analysis of test scores from grades 3-9 suspended students consistently score far below the average of all NYC students The data raise a number of important questions about how suspensions are used in different schools about their consistency and effectiveness and about the time resources and opportunity costs entailed by the process The authors plan to conduct personal interviews with principals administrative staff and teachers in order to begin answering some of these questions **Bad Draws, Bad Bets, Bad Apples and Bad Policies** Peter H.
