## Here are some SEO strategies:

### Keyword optimization

Make a page's content more relevant to a search query. This can include using keywords in the page title, URL, meta description, H1 text, and content.

### Meta descriptions

Write a short, relevant summary of the page's content that interests and informs users. This is one of the first things people see when searching for something, so it's important to optimize it to convince users to click on the result.

### Link building

Get other websites to link to your website to build a network of links and strengthen its authority in search engines.

### Crawling and indexing
