**Research Handbook on University Rankings** Hazelkorn, Ellen,Mihut, Georgiana,2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact **Inclusion through Access to Higher Education**,2017-01-01 A key feature of the 21st century is undoubtedly the increased flow of goods ideas and people across geographical cultural and political boundaries which has led to new dynamics and ever more complex forms of interconnectedness In this context the inclusion of people on the move through education is a central issue which this book addresses in an original way it combines three extensively yet often separately studied themes namely access to higher education immigration and languages Written by both established and new researchers the studies which make up this interdisciplinary volume shed light on the complex political social and cultural dynamics at play between the three dimensions in different settings Drawing on the specific stakes related to higher education the tensions between barriers and opportunities for future students such as immigration regulations language policies and internationalization strategies are analysed and confronted with less visible yet powerful logics such as personal and professional aspirations cultural identities or family priorities Decades after many national higher education systems strove to widen access internally to under represented groups this book offers new international comparative insights on the way higher education can meet external demands from people experiencing chosen or unchosen displacement while taking hold of the specific challenges raised by their linguistic and cultural diversity

**Classroom Connect Newsletter** ,1999 **In Pursuit of World-Class Universities** Marcelo Rabossi,K.M. Joshi,Saeed Paivandi,2018-03-10 The pursuit to construct world class universities is an ongoing global obsession across the world which lays emphasis on the development of competitive higher education and research systems as core national economic approach The portrayal world class is more contextual rather than absolute the expression world class university has an irrefutable cachet There is no solo clear cut definition of what organises a world class university WCU but there are few common attributes that majority of the experts point towards The three attributes

stated by Philip Altbach and Jamil Salmi that focus on a high concentration of talent abundant resources and favourable governance have been widely discussed in writings and practice Both in developing and developed countries policymakers and higher education leaders are attempting to identify and outline their desires and plans aimed at achieving global ranking for their university universities Despite condemnation of the methodology the choice of indicators and weightings and the reliability and quality of data used for comparing performance the obsession for constructing world class universities has increased over the period of time But how much do we really discern or comprehend regarding the ranking systems What do the rankings really measure Do rankings measure the quality and help in attaining the broad assignment of higher education Does the competition as outcome of ranking raise standards Is the ranking system an apposite instrument to frame higher education policies This edited volume tries to look at the concept of world class universities in milieu of different countries of the world and explore their experiences either in existing WCUs or constructing WCU or attempting to create WCU The country based chapters show differentiated paths of achievements and their approach towards the concept of WCU
