Max Streaming 2025:

From Telenovelas to Netflix: Transnational, Transverse Television in Latin America Joseph Straubhaar, Melissa Santillana, Vanessa de Macedo Higgins Joyce, Luiz Guilherme Duarte, 2021-12-06 This book is about television in Latin America. Its national and regional industries create most television programming there within genres developed over time in the region. However, part of the programming has always come from the U.S., Europe, and elsewhere. With cable, satellite, and now streaming TV, that inflow of foreign programming has increased substantially. While many in the audience still prefer national or regional programs for their cultural proximity, an increasing number among the upper middle and middle classes, particularly the young, are turning to the new foreign services like Netflix, Amazon, and Disney for class distinction, cosmopolitanism, or other motives. Among the television industries, global, regional, and national actors are creating a variety of programs and channels, broadcast, pay TV, and streaming, to segment and appeal to different parts of the audience.

Netflix and Streaming Video Amanda D. Lotz, 2022-07-22 Netflix and Streaming Video is the first book to provide a comprehensive foundation for understanding the business of subscriber-funded streaming video and its implications for the role of these services in culture. Drawing on Lotz's two decades of research, it highlights the similarities and differences among streaming video services, Netflix, Amazon, and video distribution technologies, broadcast, satellite, internet. Making a number of provocative and thought-provoking arguments, the book first reveals how the reliance on subscriber payment and video on demand produces different norms and strategies compared to previous video businesses. It then investigates Netflix and how its particular blend of characteristics distinguishes it from other subscriber-funded video on demand services. The author expertly shows that by understanding the underlying economic and technological dynamics of these services and their differences, it is possible to better assess the actions taken by the companies and what the future of video may encompass. The book is a must-read for students and scholars of Media and Communications Studies, as well as those wishing to learn more about Netflix and streaming video services.
