**The Asian American Achievement Paradox** Jennifer Lee, Min Zhou, 2015-06-30 Asian Americans are often stereotyped as the model minority Their sizeable presence at elite universities and high household incomes have helped construct the narrative of Asian American exceptionalism While many scholars and activists characterize this as a myth pundits claim that Asian Americans educational attainment is the result of unique cultural values In *The Asian American Achievement Paradox* sociologists Jennifer Lee and Min Zhou offer a compelling account of the academic achievement of the children of Asian immigrants Drawing on in depth interviews with the adult children of Chinese immigrants and Vietnamese refugees and survey data Lee and Zhou bridge sociology and social psychology to explain how immigration laws institutions and culture interact to foster high achievement among certain Asian American groups For the Chinese and Vietnamese in Los Angeles Lee and Zhou find that the educational attainment of the second generation is strikingly similar despite the vastly different socioeconomic profiles of their immigrant parents Because immigration policies after 1965 favor individuals with higher

levels of education and professional skills many Asian immigrants are highly educated when they arrive in the United States. They bring a specific success frame which is strictly defined as earning a degree from an elite university and working in a high status field. This success frame is reinforced in many local Asian communities which make resources such as college preparation courses and tutoring available to group members including their low income members. While the success frame accounts for part of Asian Americans high rates of achievement, Lee and Zhou also find that institutions such as public schools are crucial in supporting the cycle of Asian American achievement. Teachers and guidance counselors for example who presume that Asian American students are smart, disciplined and studious provide them with extra help and steer them toward competitive academic programs. These institutional advantages in turn lead to better academic performance and outcomes among Asian American students. Yet the expectations of high achievement come with a cost: the notion of Asian American success creates an achievement paradox in which Asian Americans who do not fit the success frame feel like failures or racial outliers. While pundits ascribe Asian American success to the assumed superior traits intrinsic to Asian culture, Lee and Zhou show how historical, cultural and institutional elements work together to confer advantages to specific populations. An insightful counter to notions of culture based on stereotypes, *The Asian American Achievement Paradox* offers a deft and nuanced understanding of how and why certain immigrant groups succeed.

Philip Geer, Stephen A. Reiss, 2022-07-05. A guide to preparing for the SAT college entrance exam featuring test taking strategies, practice problems and exercises.

*Rethinking College Admissions* OiYan A. Poon, Michael N. Bastedo, 2022-08-16. *Rethinking College Admissions* probes the many facets of higher education admissions and translates research-backed insights into actionable strategies for innovative, equitable admissions practices. Edited by scholars OiYan A. Poon and Michael N. Bastedo, this collection gives readers an evidence-based understanding of postsecondary admissions practices and structures, exploring many factors that affect college access and educational equity in the United States. These collected essays from leading experts present boundary-pushing applied research on admissions with implications for policy, practice and leadership. The volume considers admissions issues from three angles. In the opening essays, contributors offer critical analyses of current admissions approaches in higher education, delineating the delicate balance of equity-building efforts and legal pressures. The contributors offer reflections on whether and how admissions systems further inclusion or inequality. They examine topics such as race-conscious admissions, holistic review without standardized test scores and student test preparation. The volume's next part discusses the many different ways in which admissions work can be done, outlines ethical hazards and considers potential areas for organizational change. The final essays provide inroads and examples for developing reciprocal relationships in research and practice for the future. They discuss promising approaches for advancing campus diversity such as admissions lotteries, direct enrollment and institutional promise programs for high-achieving students from low-income communities. A must-read for practitioners, policy makers and anyone interested in
