Combined Parent-Child Cognitive Behavioral Therapy Melissa K. Runyon, Esther Deblinger, 2013-09-19 Violence is an epidemic that negatively impacts children across their lifespan. Reports indicate 2.1 million youth have experienced physical abuse during their lifetimes, disrupting the healthy development of children from the toddler years through adolescence and most cases involve parents. Some parents lack the skills to effectively parent and use physical discipline as a strategy to control their children's problem behaviors. They may use increasing force if children continue to be noncompliant, which places many children at risk for harm. Combined Parent-Child Cognitive Behavioral Therapy (CPC CBT) created by Melissa K. Runyon and Esther Deblinger and outlined in this guide provides an evidence-based intervention aimed at empowering families to develop optimistic outlooks on parenting and peaceful home environments and to decrease stress experienced both by parents and children. CPC CBT incorporates elements from empirically supported CBT models for families who have experienced physical abuse, sexual abuse, and domestic violence. Additionally, CPC CBT draws on concepts from developmental theory, learning theory, family systems theory, and motivational interviewing. The target population includes children ages 3-17 years and their parents/caregivers who have already engaged in or are at risk for physically abusive behavior towards their children. This manual is for clinicians, clinical supervisors, administrators, and others who are considering the implementation of CPC CBT in their agencies with families at risk for child physical abuse.

Helping Parents Help Their Kids Ennio Cipani, 1999 *Helping Parents Help Their Kids* is a guide both for clinicians who help families and for parents who have children with behavior problems. The author provides three ways to address clinical issues in designing and implementing child behavior management plans: a general behavioral consultation model, a specific behavioral model, and an empirically tested advice package for problems that can occur in different family contexts. Each chapter provides early research on a specific strategy and several forms to use in the clinical environment. Parents will find this book helpful because the information is presented in a user-friendly format. The author explains how parents can learn specific strategies to deal with six common problems. These problems include teaching both children and adolescents to comply with the rules of the house, dealing with disruptive behavior, and addressing problems in school. *Helping Parents Help Their Kids* offers both clinicians and parents effective procedures without the technical jargon many typical behavioral texts use. Instead, the author explains these methods in common sense terms that will be a welcome change for all who want to find solutions for their child's behavioral problems.
