to sending emails and text messages Fortunately there are many ways to go about performing these tasks yet unfortunately you will need to choose the platform you are going to use to do this because you will need to decide on which method or software you will be using It s important to choose a platform that is easy to use and also something the people you will be communicating with can also use without having too much of a learning curve in case they are not too tech savvy Just like with most software there are a few vendors who dominate the market for their respective types of applications such as Microsoft does for operating systems Windows and word processors Microsoft Word You have most likely heard of other software such as Skype that allows video calls and GoToMeeting which is commonly used in the business sector for hosting online meetings that can be accessed from anywhere you have an Internet connection Recently Zoom Video Communications has been gaining ground with their Zoom online meeting and webinar software as one of the most commonly used online tools being used today The Zoom software is fairly easy to use and can be configured to suit just about anyone s needs It s easy enough for the typical home user to use to host video calls with friends and family members and also robust enough for the business user who needs to hold meetings and host webinars for their clients For those of us who like things that are free Zoom has a free version that has a lot of features included as well as other pay for versions with more advanced features This way you can try it out and see if it does the job for you and if you later decide you would like to take advantage of more of the advanced features then you can get yourself a subscription to enable these features Regardless of what version you use you should be able to get the hang of how Zoom works fairly quickly and be able to start hosting meetings and webinars in no time The goal of this book is to get you up and running with Zoom and show you how to host meetings and webinars as well as go over all of the basic features of Zoom and also some of the more advanced options I will also go over the configuration settings so you will know how to customize Zoom to make it work just the way you want it to work So on that note let s get the communication channels open
