The China Paradox Paul G. Clifford, 2021-12-06 In The China Paradox At the Front Line of Economic Transformation Harvard University based historian of modern China and business strategist Dr Paul G Clifford documents the twists and turns of China's dramatic and unforeseen rise over the last four decades He sheds light on the delicate and fragile balance of forces at the heart of the success of China's hybrid model explaining how the ruling Communist Party boldly led the nation's economic reforms as the surest way to preserve its grip on political power Five years after this book was first published much has changed within China and in its relationship with the world This second edition provides extensive fresh new material It explains how China has raised its game moving from a catch up mode to technological innovation in some areas while still languishing in technology dependence in other respects Earlier China had shown signs that its driving spirit was faltering with its sails flapping Under Xi Jinping renewed energy has been injected But at the same time Xi and his party have strongly reinforced their control across society and the economy posing the question of whether Xi's New Era in fact marks a retreat from the reforms This second edition contains two new chapters One profiles Huawei a national champion in advanced technology Another focuses on China's frictions with the world which have been fueled by a perception that its technology progress threatens US global dominance coupled with China's human rights record In addition against a background of the challenges faced by Alibaba and other firms there is analysis of this watershed in China's private sector's autonomy There is also extensive new insight into Xi Jinping's rule As it celebrates its 100th anniversary in 2021 the Chinese Communist Party displays strong optimism over its continued governance of China But that should not mask the longer term risks to China's development and stability if its hybrid model continues to unravel as reforms are abandoned in favor of heightened autocracy
