Lifewide Learning in Postdigital Societies Luisa Conti, Fergal Lenehan, 2024-02-05 The Internet has penetrated material reality to such an extent that it is now often impossible to disentangle the material from the virtual. In this postdigital scenario the encounter with newness becomes accessible at the touch of a button 24/7. Learning becomes a lifewide experience which allows for the emergence of new culturalities. The contributors to this volume engage with cultural changes brought about by an intensified digitalization process in the context of formal education but also shed light on unexpected contexts in which informal learning experiences take place every day, strengthening diasporas, creating new connections and transforming ourselves and our societies.

A Second Exodus Murray Friedman, 1999 A first time chronicle of the US Soviet Jewry Movement

The Border of Lights Reader Megan Jeanette Myers, Edward Paulino, 2021-09-23 Border of Lights a volunteer collective returns each October to Dominican/Haitian border towns to bear witness to the 1937 Haitian Massacre ordered by Dominican dictator Rafael Leonidas Trujillo. This crime against humanity has never been acknowledged by the Dominican government and no memorial exists for its victims. A multimodal multi-vocal space for activists, artists, scholars, and others connected to the BOL movement. The Border of Lights Reader provides an alternative to the dominant narrative that positions Dominicans and Haitians as eternal adversaries and ignores cross-border and collaborative histories. This innovative anthology asks large-scale universal questions regarding historical memory and revisionism that countries around the world grapple with today. By bringing together in one volume poetry, visual arts, literary analysis, in-depth interviews, and historical analysis, this volume will provide its readers with a comprehensive view of the causes and the aftermath of the massacre. Global Continental Changes Julia Branson, Antony Gavin Brown, Kenneth John Gregory, 1996 Palaeohydrology is the study of changes in the waters of the Earth prior to continuous monitoring. Knowledge of these changes is important for the understanding of past and present environmental changes and of the form of the present day environment. The evolution of the hydrological cycle in response to climatic change produces a chain of environmental and human consequences factors that are becoming more relevant as

climate change is predicted Evidence of past environmental changes may be used to validate models with which to predict future change thus the study of rates mechanisms and processes of Late Quaternary hydrological changes is of critical importance This volume is designed for all who are interested in the hydrological impacts of climatic change and the contribution that palaeohydrology can make to the study of these changes Boys and Girls in No Man's Land Susan Fisher,Susan R.
