## **The Vocation Lectures Hackett Classics:**

The Vocation Lectures Max Weber,2004-03-15 Originally published separately Weber's Science as a Vocation and Politics as a Vocation stand as the classic formulations of his positions on two related subjects that go to the heart of his thought the nature and status of science and its claims to authority and the nature and status of political claims and the ultimate justification for such claims Together in this volume these newly translated lectures offer an ideal point of entry into Weber's central project understanding how as Weber put it in the West alone there have appeared cultural manifestations that seem to go in the direction of universal significance and validity

*The Interest in Disinterestedness* Pierre Bourdieu,2024-07-04

A key feature of those who work for the state in the legal system and in public services is that they claim to be putting their own personal interests aside and working in a disinterested fashion for the public good But is disinterested behaviour possible Can law be treated as a set of universal rules that are independent of particular interests or is this mere ideology Is the state bureaucracy a universal class as Hegel thought or a structure that serves the interests of the dominant class as Marx claimed In his lecture courses at the Collège de France in 1987-88 and 1988-89 Pierre Bourdieu addressed these questions by examining the formation of the legal and bureaucratic fields characteristic of the modern state uncovering the historical and social conditions that enable a social group to form and find its own interests in the very fact of serving

interests that go beyond it For a disinterested universe to emerge it needs both the invention of a public service or a spirit of service to the public cause and the creation of a social universe in which individuals can pursue a career devoted to public service and be rewarded for it In other words it requires a process of specialization whereby autonomous specific fields become established in the social cosmos within which a special kind of game that follows the rules of disinterest can be

played out By reconstructing the conditions under which an interest in disinterestedness emerged Bourdieu sheds new light on the formation of the modern state and legal system and provides a fresh perspective on the many professions in modern societies that are oriented towards the service of the common good
