## **The Unknown Reality Volume Two:**

The Unknown Reality, Vol 2 Jane Roberts, 2011-07-08 From the Bestselling Author of *Seth Speaks* In this second volume of *The Unknown Reality* Seth radically expands our conceptions of self by showing us that the human personality is literally infinite in its scope and potential He discloses precisely how probable realities combine to create our waking lives and how our higher selves make decisions regarding our everyday existence In a far reaching exploration of the dynamics of desire and free will he asserts that each atom molecule and cell has its own consciousness and powers of choice With humor and simple analogies Seth leads us beyond our ordinary level of awareness into a spectacular discovery of the multidimensional nature of the self including Consciousness units as the basis of our universe The relevance of extrasensory perception in understanding our world The worlds we visit in dreams and out of body states Dreaming as a science to create present and future realities Families of consciousness we choose to belong to Practical methods for exploring your own unknown reality There is an unknown reality I am part of it and so are you Each individual is a part of the unknown reality To explore the unknown reality you must venture within your own psyche travel inward through invisible roads as you journey outward on physical ones I hope that in this book the reader can see the greater dimensions that touch ordinary living and sense the psyche's greater magic Jane Roberts Speaking for Seth

*The "unknown" Reality* Jane Roberts, 1979 **Bottoming Out the Universe** Richard Grossinger, 2020-04-07 An exploration into consciousness the universe and the nature of reality Draws on transdimensional physics and biology reincarnation and past life memories animal consciousness multiple identities thoughtforms soul pictures and paranormal phenomena like crop circles and poltergeists Explores the riddle of personal identity and how it differs from consciousness Reveals that consciousness is more than encompassing all that exists it also speaks to what has yet to manifest Scientific orthodoxy views the universe as conceived of matter protons neutrons electrons down to the smallest particle quarks But when you keep digging what is beneath quarks The scientific worldview does not take into account consciousness or life itself How did consciousness become part of the material universe Is it a by product of brain chemistry or a constituent of reality Or to dig deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it In this investigation into consciousness the universe and the nature of reality Richard Grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter He presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories Exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts He then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like UFOs faeries and poltergeists He also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle

of quantum mechanics Examining nonlocal and transpersonal modes of consciousness Grossinger looks at the difference between consciousness and personal identity He expands this discussion with reflections on Sethian cosmology using Seth's own words and Jane Roberts's and John Friedlander's interpretations He reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all why there is something rather than nothing Skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe Grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency □□□□(□□) Jane Roberts□□□□□□□□,2020-10-20 **The Complete Handbook of Holistic**
