Ai Tools Review:

Generative Artificial Intelligence Empowered Learning Mahmoud Elkhodr, Ergun Gide, 2025-06-23 This book explores the integration of Generative Artificial Intelligence GenAI such as ChatGPT into educational practices and research methodologies. With the potential to transform traditional learning environments, this book addresses both the opportunities and challenges that come with leveraging GenAI for enhancing teaching and learning experiences. This comprehensive guide delves into multiple aspects of GenAI in education. It covers critical topics such as project based learning (PBL), personalized learning through AI, AI driven student assessment, and the role of AI in special education. Furthermore, it examines ethical considerations, the readiness of students and teachers for AI technologies, and case studies on AI's impact on student outcomes. With insights from educators, researchers, and practitioners from around the globe, the book provides a balanced perspective on both theoretical frameworks and practical implementation of GenAI technologies. Ideal for educators, researchers, and policymakers, this book serves as a practical resource for those looking to effectively integrate AI into their pedagogical and research efforts. It is an essential reference for anyone interested in staying at the forefront of educational innovation and exploring the future possibilities of AI empowered learning.

Utilizing AI Tools in Academic Research Writing Srivastava, Anugamini Priya, Agarwal, Sucheta, 2024-05-02 Those entrenched in academia often have daunting processes of formulating research questions, data collection, analysis, and scholarly paper composition. Artificial intelligence (AI) emerges as an invaluable ally, simplifying these processes and elevating the quality of scholarly output. Where the pursuit of knowledge meets the cutting edge of technology, *Utilizing AI Tools in Academic Research Writing* unfolds a transformative journey through the symbiotic relationship between AI and academic inquiry. It offers practical insights into the myriad ways AI can revolutionize academic pursuits. This book extends beyond theoretical discussions, delving into practical dimensions of AI integration, demonstrating how it facilitates topic identification, refines research design, empowers data analysis, and enriches literature reviews. Readers will explore AI's indispensable role in precise hypothesis development, enhancing the very foundation of academic inquiry. The book introduces AI-powered tools that streamline writing and editing, ensuring research papers meet the highest standards of clarity and correctness. Ethical considerations in AI integrated research take center stage, emphasizing responsible and transparent practices. This book is ideal for doctoral candidates, master's students, undergraduates, or seasoned faculty members.

Artificial Intelligence in Recruiting. A Literature Review on Artificial Intelligence Technologies, Ethical Implications and the Resulting Chances and Risks Matthias Rudolph, 2021-01-07 Master's Thesis from the year 2020 in the subject Computer Sciences Artificial Intelligence grade 1.3 Friedrich Alexander University Erlangen Nuremberg Wirtschaftsinformatik language English abstract The thesis aims to analyze this field of tension between the benefits and risks caused by the introduction of AI into recruiting based on a systematic analysis of academic publications. To the knowledge of the author, neither a literature review on ethical challenges

of AI based recruiting tools nor an overview addressing application fields and the resulting ethical risks has been published so far. Consequently this thesis aims to close this research gap by disclosing how AI technologies affect the recruiting process and how ethical challenges arising from the implementation of AI based tools are addressed in the same publications. Consequently research question RQ one RQ1 and RQ two RQ2 can be derived: Which AI technologies are applied in the field of recruiting and how do they influence the recruiting process? Which major ethical challenges arise from the introduction of AI into recruiting and how are these challenges addressed by the proposed AI based tools? Addressing these two RQs the remainder of this thesis is structured as follows: Chapter 2 classifies recruiting and its subprocesses as a part of Human Resources HR establishes a common understanding of AI and machine learning ML algorithms relevant in AI based recruiting tools and derives major ethical challenges with a focus on the ethical principles fairness and transparency. In chapter 3 the methodical approach used for identifying and selecting relevant literature is described. Chapter 4 answers both RQs based on the AI based recruiting tools included in the literature set. In turn the first part of the analysis focuses on analyzing how the needs raised through traditional recruiting means are addressed by AI based recruiting tools also touching base on the underlying technologies. The second part addresses if and where applicable how these publications incorporate fairness and transparency. Subsequently chapter 5 discusses the main findings of the analysis of the literature set and provides implications for theory and practice followed by a brief conclusion and the outlining of limitations and future research fields in chapter 6.
