The

Human-Centered Classroom KHRITISH SWARGIARY, 2025-11-14 Education is standing at the edge of the greatest transformation in human history For centuries schools were designed like factories students entered as raw material were processed through standardized curricula and were expected to emerge as identical products ready for the workforce That model once served a world driven by industrial labor limited information and predictable career paths But today we live in an age of artificial intelligence global connectivity cultural diversity emotional crises and unprecedented technological acceleration The old system is no longer just outdated it is dangerously inadequate This book was born from a simple but urgent question What should education look like in a world where machines can think information is infinite and human beings are searching for meaning As an educator researcher and lifelong learner I have spent years working at the intersection of inclusive education educational technology and policy driven reform Through my engagement with students

teachers parents researchers and institutions one reality has become painfully clear while technology is advancing rapidly our education systems are failing to keep pace with the human needs of learners Children are more connected than ever before yet emotionally more isolated Knowledge is everywhere yet understanding is rare Tools are powerful yet compassion and creativity are often neglected This book does not argue that technology is the problem On the contrary it recognizes artificial intelligence digital learning platforms and data driven education as some of the most powerful allies humanity has ever created What we must question however is how these tools are used and whether they are designed to serve human growth or simply economic efficiency When technology is introduced without empathy it deepens inequality When used without ethics it weakens trust But when aligned with human values it becomes a force for extraordinary transformation At the heart of this book lies a conviction The future of education must be human centered emotionally intelligent and radically inclusive Every child whether gifted or struggling disabled or neurodivergent wealthy or underprivileged deserves an education that recognizes their dignity potential and individuality For far too long education systems across the world have defined success by narrow standards of academic performance while ignoring emotional wellbeing creativity adaptability and purpose The result is a generation of students who may be skilled yet uncertain knowledgeable yet disconnected from themselves and the world This book calls for a new educational philosophy one that integrates artificial intelligence with emotional intelligence digital tools with ethical responsibility and innovation with inclusion It presents a vision of classrooms where technology does not replace teachers but empowers them where data supports learning but does not erase human judgment and where every learner regardless of ability or background is seen heard and supported I have written this book not merely as an academic contribution but as a deeply personal and professional commitment to the future of education It is meant for teachers seeking meaning beyond exams policymakers looking for sustainable reform researchers pursuing impact and students who deserve a learning experience that prepares them not only for jobs but for life The world our children will inherit will be complex uncertain and technologically advanced But it must also be compassionate fair and deeply human Education is the bridge between those two realities If we build that bridge wisely we can ensure that artificial intelligence enhances human potential rather than diminishing it and that progress never comes at the cost of dignity This book invites you to imagine design and lead that future Khritish Swargiary Author AKA KS Luminar **Language Education in Saudi Arabia: Integrating Technology in the Classroom** Ali H. Al-Hoorie, Connie Mitchell, Tariq Elyas, 2025-03-14 This volume addresses the pressing need for integrating technology into language learning and teaching practices In an age where technology shapes every aspect of our lives educators face the challenge of harnessing its power to enhance language education This book provides a nuanced exploration of this complex issue offering practical insights and innovative solutions It discusses various perspectives on technology's role in language education from artificial intelligence technology to hybrid learning approaches It also examines the impact of tools such as the Reading Progress tool on students reading skills and

explores how exposure to language through media influences speaking proficiency Additionally the book deals with corpus based studies and provides a comprehensive systematic review of research on technology and language learning in Saudi Arabia It also addresses the challenges posed by the COVID 19 pandemic and offers insights into adapting language teaching pedagogy to online environments ensuring continuity and effectiveness in language education This book is essential for researchers policymakers educators students and anyone interested in leveraging technology to revolutionize language education in Saudi Arabia and beyond

Four Days a Week Juliet Schor, 2025-06-03 Bestselling author leading sociologist and economist Juliet Schor makes the case for a four day work week persuasively showing how this model can address major challenges such as burnout AI and the climate crisis and how employees companies and governments can work together to make it a reality Around the world long hours and intense pressure are taking their toll When the pandemic hit in 2020 work induced stress and burnout skyrocketed Many reached a breaking point Now three quarters of the world's employees are disengaged and struggling including in the US and Canada where half are experiencing high levels of daily stress Our current work culture the five day forty hours a week model which has gone unchanged for nearly a century is failing But a remedial countertrend has emerged the four day work week Kickstarter Bolt Basecamp ThredUp and hundreds of other employers have eliminated the fifth day of work successfully figuring out how to maintain productivity while seeing remarkable improvements in employee well being Hiring is easier and fewer people are quitting These results are global Working a four day week people feel energized capable and more optimistic about their lives and their jobs *Four Days a Week* is the first large scale study of this trend Juliet Schor an expert who has researched and written about work for more than four decades beginning with her New York Times bestseller *The Overworked American* in 1992 shares her pioneering analysis of the benefits of a shorter work week how companies can achieve them why the concept has taken so long to emerge and gain acceptance and why doing so will help a company's employees and its bottom line The book is a blueprint for implementing a change that once seemed radical but is now within reach
