Public Actors in International Investment Law Catharine Titi, 2021-03-03 This open access book focuses on public actors with a role in the settlement of investment disputes Traditional studies on actors in international investment law have tended to concentrate on arbitrators claimant investors and respondent states Yet this focus on the principal players in investment dispute settlement has allowed a number of other seminal actors to be neglected This book seeks to redress this imbalance by turning the spotlight on the latter From the investor s home state to domestic courts from sub national governments to international organisations and from political risk insurance agencies to legal defence teams in national ministries the book critically reviews these overlooked public actors in international investment law

Comparative International Law Approaches for Optimizing Petro-Wealth in Nigeria: The Sustainable Development Pathway Dr. Onome Ejenavi, 2024-03-24 International and Comparative Law Approaches for Optimizing Petro Wealth in an SDGs Context and in harmony with sustainable development forms the core and subject of this book This book considers a beleaguered Nigerian oil industry and the pervasive contemporary struggles to sustain lucrative oil production in the 21st Century Currently Nigeria grapples with unrelenting and intractable challenges in its oil industry and apparently a plausible means of alleviating the extensive negative impacts of untenable oil exploitation patterns in the Niger delta have remained elusive From the foregoing the missing ingredient seems to be a dismal lack of sustainability endeavored approaches to guarantee a green petroleum industry economic growth and poverty eradication which remain vital considerations for a developing state like Nigeria Apparently the development that meets the needs of the present without compromising the interests options and indeed the needs of future generations summed up in the definition of sustainable development appears to be a maxim with

minimal recognition or import in the Niger Delta which remains the hub of oil exploitation in Nigeria This book is thus motivated by the constantly evolving yet irrefutable implications arising from the concept of Sustainable Development and how it can be realistically applied to oil and gas exploitation *Guide to Energy Arbitrations* J William Rowley QC,2017-06-21 Global Arbitration Review s The Guide to Energy Arbitrations is an essential desk top reference tool for energy companies their advisers and arbitrators bringing together a number of pre eminent authors and pulling together the latest and best approaches to the myriad issues confronted in today s energy disputes J William Rowley QC of 20 Essex St acts as General Editor editors are Doak Bishop of King The Guide to Energy Arbitration is a very useful and unique contribution to the literature in the area it assembles the views and insights of leading counsel and arbitrators on many of the key issues and trends in the energy arbitration world It should be a valuable guide to energy companies and their internal and external counsel in addition to being of interest to commercial and litigation lawyers generally Glenn Zacher Partner Stikeman Elliot **Regulation of State-Controlled Enterprises** Julien Chaisse,Jędrzej Górski,Dini Sejko,2022-08-25 This book analyses actual and potential normative whether legislative or contractual conflicts and complex transnational disputes related to state controlled enterprises SCEs operations and how they are interwoven with the problem of foreign direct investment Moreover SCEs also fall within the remit of international political economy international economics and other SCE related fields that go beyond purely legal or regulatory matters In this connection research on such economic and political determinants of SCE s operations greatly informs and supplements the state of knowledge on how to best regulate cross border aspects of SCE s and is also be covered in this book The book also aims to analyse the SCE phenomenon which includes a wide panoply of entities that have various structures with different degrees of control by states at the central or regional level and that critically discuss the above mentioned overlapping legal economic and political systems which can emerge under various shades of shadows casted by governmental umbrellas i e the control can be exercised through ownership right to appoint the management and special voting rights The chapters in this book are grouped so as to address cross border investment by and in SCE into four coherent major parts namely i the regulatory framework of state capitalism laws treaties and contracts ii economic and institutional expansion of state capitalism iii the accountability of state capitalism exploring the forms of liabilities and iv regional and country perspectives Contributions address the core theme from a broad range of SCE and international economic regulations including but not limited to competition law WTO law investment law and financial monetary law They also cover the new emerging generation of Free Trade Agreements EU Vietnam FTA EU China investment treaty Regional Comprehensive Economic Partnership and the coordination between treaty systems The book is a valuable addition and companion for courses such as international trade law international law of foreign investment transnational law international and economic development world politics law of preferential trade agreements international economics and economics of development **China's Global Energy Expansion** Xiaohan Gong,2024-10-03 Should Chinese

energy investments be excluded from the liberal economic system based on geopolitical assessments only This book explores the potential regulatory control by the Chinese government over foreign energy investments to achieve their perceived strategic objectives Host states in which Chinese energy companies make investments have increasingly opposed Chinese energy investments in their national security reviews based on concerns that these investments have strategic objectives The book analyses China's investment related law regulations and energy policies to examine how overseas energy investment making is governed The book also explores the role of the Chinese government in energy investment promotion and protection Uniquely the examination of China's potential regulatory control provides an objective criterion rather than geopolitical considerations for host states to assess the nature of Chinese energy investments The book helps readers to open the black box of Chinese energy investments from a regulatory perspective It is a useful resource for researchers as well as practising lawyers assisting their Chinese clients through national security reviews or when trying to determine whether China's SOEs can bring cases before investor state arbitration tribunals
