Spaces And Borders Spaces And Borders:

In-Between Border Spaces in the Levant Daniel Meier, 2020-12-17 This book focuses on interstitial spaces or in between borders in the Middle East Using various case studies it raises the question how actors living in these regions perform their belonging despite the apparent constraints of history and politics In recent years the Middle East has seen States attempts to shape buffer zones or safe zones in border regions for example in Syria s borderlands in the aftermath of the civil war Typically studies on in between borders refer to three interrelated aspects space territorial symbolic power states or non state actors and identity definition of the self other In this volume the authors investigate these axes of research through the notions of sovereignty and belonging in order to assess how these concepts may highlight in betweenness through a political dimension Stemming from a perception of the borders as processes these various studies aim to explore the theoretical potential of in between border spaces to re think sovereignty and identity belonging in such interstitial zones While notions such as heterotopia margins liminality borderlands buffer zones no man s land or frontiers will be explored each case study highlights how actors territory and powers relate to each other in order to improve our understanding of historical and political process that are shaping identities under spatial constraints The chapters in this book were originally published as a special issue of the journal Mediterranean Politics

Boundaries and Borders in the Post-Yugoslav Space Nenad Stefanov, Srdjan Radović, 2021-10-25 The disintegration of Yugoslavia accompanied by the emergence of new borders is paradigmatically highlighting the relevance of borders in processes of societal change crisis and conflict This is even more the case if we consider the violent practices that evolved out of populist discourse of ethnically homogenous bounded space in this process that happened in the wars in Yugoslavia in the 1990ies Exploring the boundaries of Yugoslavia is not just relevant in the context of Balkan area studies but the sketched phenomena acquire much wider importance and can be helpful in order to better understand the dynamics of b ordering societal space that are so characteristic for our present situation

Spaces and Identities in Border Regions Christian Wille, Rachel Reckinger, Sonja Kmec, Markus Hesse, 2015-11-17 Spatial and identity research operates with differentiations and relations These are particularly useful heuristic tools when examining border regions where social and geopolitical demarcations diverge Applying this approach the authors of this volume investigate spatial and identity constructions in cross border contexts as they appear in everyday institutional and media practices The results are discussed with a keen eye for obliquely aligned spaces and identities and relinked to governmental issues of normalization and subjectivation The studies base upon empirical surveys conducted in Germany France Belgium and Luxembourg

Borders and the Politics of Space in Late Medieval Italy Luca Zenobi, 2023 Space matters It situates our history structures our daily lives and often determines what we can and cannot do Borders are central to this reality This book explores how borders were understood made and encountered at the end of the Middle Ages and what they can tell us about the spatial fabric of society at the threshold of

modernity **Border images, border narratives** Johan Schimanski, Jopi Nyman, 2021-02-02 This interdisciplinary volume explores the role of images and narratives in different borderscapes. Written by experienced scholars in the field, *Border images, border narratives* provides fresh insight into how borders, borderscapes and migration are imagined and narrated in public and private spheres. Offering new ways to approach the political aesthetics of the border and its ambiguities, this volume makes a valuable contribution to the methodological renewal of border studies and presents ways of discussing cultural representations of borders and related processes. Influenced by the thinking of philosopher Jacques Rancière, this timely volume argues that narrated and mediated images of borders and borderscapes are central to the political process as they contribute to the public negotiation of borders and address issues such as the invisibility of migrants and the formation of alternative borderscapes. The contributions analyse narratives and images in literary texts, political and popular imagery, surveillance data, border art and documentaries as well as problems related to borderland identities, migration and trauma. The case studies provide a highly comparative range of geographical contexts ranging from Northern Europe and Britain via Mediterranean and Mexican USA borderlands to Chinese borderlands from the perspectives of critical theory, literary studies, social anthropology, media studies and political geography.

Cosmopolitan Spaces Chris Rumford, 2008-06-30 The book advances a provocative critical reading of both globalization theory and contemporary Europe. Concerned with questions of space, borders and governance, *Cosmopolitan Spaces* challenges conventional notions of cosmopolitanism and its relevance to conceptualizations of space and offers a fresh take on the meaning and implications of globalization.

Borders, Fences and Walls Assoc Prof Elisabeth Vallet, 2014-08-28 Twenty years after the fall of the Berlin Wall, the question remains: Do good fences still make good neighbours? Since the Great Wall of China, the Antonine Wall built in Scotland to support Hadrian's Wall, the Roman Limes or the Danevirke fence, the wall has been a constant in the protection of defined entities claiming sovereignty East and West. But is the wall more than an historical relict for the management of borders? In recent years, the wall has been given renewed vigour in North America, particularly along the US-Mexico border and in Israel-Palestine. But the success of these new walls in the development of friendly and orderly relations between nations or indeed within nations remains unclear. What role does the wall play in the development of security and insecurity? Do walls contribute to a sense of insecurity as much as they assuage fears and create a sense of security for those behind the line? Exactly what kind of security is associated with border walls? This book explores the issue of how the return of the border fences and walls as a political tool may be symptomatic of a new era in border studies and international relations. Taking a multidisciplinary approach, this volume examines problems that include security issues, the recurrence and/or decline of the wall, wall discourses, legal approaches to the wall, the wall industry and border technology as well as their symbolism, role, objectives and efficiency.

International Boundaries in a Global Era Lawrence Herzog, Keith J Hayward, 2017-10-02 As we move deeper into the twenty-first century, the forces of globalisation continue to transform both the spaces around international

borders and the social processes cultural practices economies and political dynamics within and between these spaces The geographies of border regions have undergone a dramatic transformation over the last half century nation state boundaries growing ever more porous in many though not all areas of the planet Global trade has become an accepted norm in business transactions almost everywhere Coupled with the revolution in digital technology the era of globalisation promises to continue to challenge old ideas with new approaches to understanding international boundaries and the regions they impact All of the chapters in this book mainly drawn from the US Mexico border with comparisons to Europe speak to the ways in which border regions have become important places in their own right spaces where people live work and create art where corporations invest where crimes occur and where security remains a concern They are therefore spaces that need to be better understood and managed especially in light of the cross national and global forces impinging upon them This book was originally published as a special issue of *Global Society* *Young People, Border Spaces and Revolutionary Imaginations* Stuart Aitken, Fernando Bosco, Thomas Herman, Kate Swanson, 2013-12-16 Drawing from discussions that pulled together child researchers working near the borders of Mexico the United States and Canada this book explores how material and metaphoric borders give way to young people's experimentations with cultural social and political change The contributors highlight the capacities of children to revolutionize thought and practice through creative re imagining of the boundaries borders events circumstances and familial relations that affect their everyday lives The first section in different ways highlights borders and movements through them as a bricolage of images symbols tensions and joys In the second section the idea of a portable border is explored in three chapters that consider a migrants lifecourse citizenship and political activism respectively The last section of the book brings together three chapters that uncover how youth resist confront and transform the borders that envelop their lives By weaving narratives pertaining to young people's creative stories transnational migrations personal identities pen pal programs masculinities inter generational change border crossings political activism and addictions the contributors in toto raise the idea of young people taking bounded and embodied events places and institutions and moving them towards something emancipatory sin fronteras without borders This book was published as a special issue of *Children's Geographies* **Kimball's Dairy Farmer**, 1917 **Borders, Legal Spaces and Territories in Contemporary International Law** Tommaso Natoli, Alice Riccardi, 2019-09-12 This book examines the challenges posed to contemporary international law by the shifting role of the border which has recently re emerged as a central issue in international relations It posits that borders do not merely correspond to States boundaries indeed while remaining a fundamental tool for asserting States power they are in fact a collection of constantly changing spatial limits Consequently the book approaches borders as context specific limits and revisits notions traditionally linked to them jurisdiction sovereignty responsibility individual rights while also adopting the innovative approach of viewing borders as phenomena of both closedness and openness Accordingly the first part of the book addresses what happens within borders investigating the

root causes of the emergence of spatial limits and re assessing apparent extra territorial assertions of State power In turn the second part not only explores typical borderless spaces but also more generally considers the exercise of States and international organisations powers and prerogatives across or beyond borders
