Spatial Econometrics Methods And Models Studies In Operational Regional Science:

Spatial Econometrics: Methods and Models L. Anselin, 2013-03-09 Spatial econometrics deals with spatial dependence and spatial heterogeneity critical aspects of the data used by regional scientists These characteristics may cause standard econometric techniques to become inappropriate In this book I combine several recent research results to construct a comprehensive approach to the incorporation of spatial effects in econometrics My primary focus is to demonstrate how these spatial effects can be considered as special cases of general frameworks in standard econometrics and to outline how they necessitate a separate set of methods and techniques encompassed within the field of spatial econometrics My viewpoint differs from that taken in the discussion of spatial autocorrelation in spatial statistics e g most recently by Cliff and Ord 1981 and Upton and Fingleton 1985 in that I am mostly concerned with the relevance of spatial effects on model specification estimation and other inference in what I call a model driven approach as opposed to a data driven approach in spatial statistics I attempt to combine a rigorous econometric perspective with a comprehensive treatment of methodological issues in spatial analysis

Economics Shanti Rabindran Gamper,2001 This thesis examines three environmental issues in developing countries The first essay examines land fires in Indonesia that inflict severe air pollution related damage on Southeast Asia annually Conservative estimates of losses in 1997 alone were US 667 million for Indonesia 0.67% of GDP and an additional US 12 million for Singapore Fire incidence on various landholdings is examined using a new author compiled database on satellite based fire and rainfall data land use maps socioeconomic and geographical information The essay finds that estates large scale industrial plantations that are rapidly expanding in the tropics raise fire incidence beyond the natural level the fire incidence on conservation areas serves as a benchmark In contrast it finds no evidence that small landholdings which are often blamed for fires raise fire incidence The government's ban on the use of clearance fires as a result of weak enforcement did not reduce fire incidence on estates Alternative policy levers that could potentially reduce these fires such as lengthening the estates leases to improve their property security are found to be ineffective The second essay examines whether education can potentially reduce households agricultural related forest clearance by increasing the returns to wage labor It

analyzes a unique survey of 649 indigenous households in protected areas in Bolivia's lowland forests. It finds that an additional year of education among household heads is associated with a reduction of 0.05 hectares or 4.3% of the annual mean household forest clearance. Increased returns of 2.6% in wage labor and a 21% increase in days worked in wage labor. Thus the 3-year average increase in education among the youngest cohorts is associated with potentially significant reduction in forest clearance in the study site though further work is needed to establish causality. The third essay examines the pollution intensity of the NAFTA-related expansion in US-Mexican trade using new detailed measures of air, water, metal, and toxic pollution intensities and injury rates at the 4-digit Standard Industrial Classification level. Based on pollution measures at this resolution, it does not find strong evidence of greater growth in the share of US net imports from Mexico in the more polluting or injurious industries.

Introduction to Spatial Econometrics James LeSage, Robert Kelley Pace, 2009-01-20. Although interest in spatial regression models has surged in recent years, a comprehensive up-to-date text on these approaches does not exist. Filling this void, *Introduction to Spatial Econometrics* presents a variety of regression methods used to analyze spatial data samples that violate the traditional assumption of independence between observations.

The Philippine Review of Economics, 2007 **Thematic Cartography, Cartography and the Impact of the Quantitative Revolution** Colette Cauvin, Francisco Escobar, Aziz Serradj, 2010. This series in three volumes considers maps as constructions resulting from a number of successive transformations and stages integrated in a logical reasoning and an order of choices. Volume 2 focuses on the impact of the quantitative revolution partially related to the advent of the computer age on thematic cartography.

Spatial Econometrics J. Paul Elhorst, 2013-09-30. This book provides an overview of three generations of spatial econometric models: models based on cross-sectional data, static models based on spatial panels, and dynamic spatial panel data models. The book not only presents different model specifications and their corresponding estimators but also critically discusses the purposes for which these models can be used and how their results should be interpreted.
