Spatial Language And Dialogue Explorations In Language And Space:

   Spatial Language and Dialogue Kenny R. Coventry,Thora Tenbrink,John A. Bateman,2009 This text considers how people talk about the location of objects and places It reports on the developments in the field of spatial language and sets an agenda for future research on spatial conceptualization and communication in cognitive science computer science psychology and linguistics   Constructions in Cognitive Contexts Franziska Günther,2016-11-07 In what ways are language cognition and perception interrelated Do they influence each other This book casts a fresh light on these questions by putting individual speakers cognitive contexts i e their usage preferences and entrenched patterns of linguistic knowledge into the focus of investigation It presents findings from original experimental research on spatial language use which indicate that these individual specific factors indeed play a central role in determining whether or not differences in the current and or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non linguistic behaviour visual attention allocation to and memory for spatial referent scenes These findings form the basis of a new speaker focused usage based model of linguistic relativity which defines language perception cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities

   Pragmatics of Space Andreas H. Jucker,Heiko Hausendorf,2022-09-20 This handbook provides a comprehensive overview of spatial configurations of language use and of language use in space It consists of four parts The first part covers the various practices of describing space through language including spatial references in spoken interaction or in written texts the description of motion events as well as the creation of imaginative spaces in storytelling The second part surveys aspects of the spatial organization of face to face communication including not only spatial arrangements of small groups in interaction but also the spatial dimension of sign language and gestures The third part is devoted to the communicative resources of constructed spaces and the ways in which these facilitate and shape communication Part four finally is devoted to pragmatics across space and cultures i e the ways in which language use differs across language varieties languages and cultures   **Speech-accompanying Gesture** Sotaro Kita,2009 When we speak we often spontaneously produce gestures Such gestures are an integral part of face to face verbal communication The relationship between speech and gesture is the theme of this Special Issue The articles cover a wide range of issues cultural differences language and gesture development cognitive development bilingualism foreign language learning persuasion and common grounds between the speaker and the addressee The Special Issue is of interest not only to those who study the multimodal nature of communication but also to those who seek new insights into psycholinguistic issues using gesture as the window into the speaker s mind

   Encyclopedia of Artificial Intelligence Stuart C. Shapiro,1990   Space in Language and Cognition Stephen C. Levinson,2003-03-20 Languages differ in how they describe space and such differences between languages can be used to explore the relation between language and thought This 2003 book shows that even in a core cognitive domain like spatial

thinking language influences how people think memorize and reason about spatial relations and directions After outlining a typology of spatial coordinate systems in language and cognition it is shown that not all languages use all types and that non linguistic cognition mirrors the systems available in the local language The book reports on collaborative interdisciplinary research involving anthropologists linguists and psychologists conducted in many languages and cultures around the world which establishes this robust correlation The overall results suggest that thinking in the cognitive sciences underestimates the transformative power of language on thinking The book will be of interest to linguists psychologists anthropologists and philosophers and especially to students of spatial cognition *The Spatial Foundations of Language and Cognition* Kelly S. Mix,Linda B. Smith,Michael Gasser,2009-12-24 This book presents recent research on the role of space as a mechanism in language use and learning It proceeds from the notion that cognition in real time developmental time and over evolutionary time occurs in space and that the physical properties of space may provide insights into basic cognitive processes including memory attention action and perception It looks at how physical space and landmarks are used in cognitive representations and serve as the basis of human cognition in a range of core mechanisms to index memories and ground meanings that are not themselves explicitly about space The editors have brought together experimental psychologists computer scientists robotocists linguists and researchers in child language in order to consider the nature and applications of this research and in particular its implications for understanding the processes involved in language acquisition Maxim Gorky Cynthia Marsh,2006 Posing questions that Soviet critics found difficult to confront the author examines the effects of exile and religion on the content and form of Maxim Gorky s plays as well as the role played by women and the personal and political implications of motherhood **Forthcoming Books** Rose Arny,2003-04 *Interactions* ,2005 A magazine for designers of interactive products **Textual Theatricality** Richard A.
